SECTION 1: Identification of the substance/mixture and of the company/undertaking

Product information
Product Name: Alkylate 105
Material: 1073229, 1077064, 1074382, 1072965, 1073230

Use: Solvent

Company: Chevron Phillips Chemical Company LP
Specialty Chemicals
10001 Six Pines Drive
The Woodlands, TX 77380

Emergency telephone:
Health:
866.442.9628 (North America)
1.832.813.4984 (International)

Responsible Department: Product Safety and Toxicology Group
E-mail address: SDS@CPChem.com
Website: www.CPChem.com

SECTION 2: Hazards identification

Classification of the substance or mixture
This product has been classified in accordance with the hazard communication standard 29 CFR 1910.1200; the SDS and labels contain all the information as required by the standard.

Classification:
- Flammable liquids, Category 3
- Specific target organ systemic toxicity - single exposure, Category 3, Central nervous system
- Aspiration hazard, Category 1

Labeling
SDS Number: 100000013849
1/13
SAFETY DATA SHEET

Alkylate 105
Version 2.1
Revision Date 2018-05-31

Symbol(s): 

Signal Word: Danger

Hazard Statements:
H226: Flammable liquid and vapor.
H304: May be fatal if swallowed and enters airways.
H336: May cause drowsiness or dizziness.

Precautionary Statements:
Prevention:
P210 Keep away from heat/sparks/open flames/hot surfaces.
No smoking.
P240 Ground/bond container and receiving equipment.
P241 Use explosion-proof electrical/ventilating/lighting/equipment.
P242 Use only non-sparking tools.
P243 Take precautionary measures against static discharge.
P261 Avoid breathing dust/fume/gas/mist/vapors/spray.
P280 Wear protective gloves/eye protection/face protection.

Response:
P301 + P310 IF SWALLOWED: Immediately call a POISON CENTER/doctor.
P304 + P340 + P312 IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER/doctor if you feel unwell.
P331 Do NOT induce vomiting.
P370 + P378 In case of fire: Use dry sand, dry chemical or alcohol-resistant foam to extinguish.

Storage:
P403 + P233 Store in a well-ventilated place. Keep container tightly closed.
P403 + P235 Store in a well-ventilated place. Keep cool.

Disposal:
P501 Dispose of contents/container to an approved waste disposal plant.

Carcinogenicity:
IARC No ingredient of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.

NTP No ingredient of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.

SECTION 3: Composition/information on ingredients

Synonyms:
Isoparaffins
Isoalkanes
Aliphatic hydrocarbon

Molecular formula: UVCB
**Alkylate 105**

**Version 2.1**

**SECTION 4: First aid measures**

**General advice**
Move out of dangerous area. Show this material safety data sheet to the doctor in attendance. Material may produce a serious, potentially fatal pneumonia if swallowed or vomited.

**If inhaled**
Consult a physician after significant exposure. If unconscious, place in recovery position and seek medical advice.

**In case of skin contact**
If on skin, rinse well with water. If on clothes, remove clothes.

**In case of eye contact**
Flush eyes with water as a precaution. Remove contact lenses. Protect unharmed eye. Keep eye wide open while rinsing. If eye irritation persists, consult a specialist.

**If swallowed**
Keep respiratory tract clear. Do NOT induce vomiting. Do not give milk or alcoholic beverages. Never give anything by mouth to an unconscious person. If symptoms persist, call a physician. Take victim immediately to hospital.

**SECTION 5: Firefighting measures**

**Flash point**
39.4 °C (102.9 °F)  
Method: Tag closed cup

**Autoignition temperature**
336 °C (637 °F)

**Suitable extinguishing media**
Alcohol-resistant foam. Carbon dioxide (CO2). Dry chemical.

**Unsuitable extinguishing media**
High volume water jet.

**Specific hazards during fire fighting**
Do not allow run-off from fire fighting to enter drains or water courses.

**Special protective equipment for fire-fighters**
Wear self-contained breathing apparatus for firefighting if necessary.

**Further information**
Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. For safety reasons in case of fire, cans should be stored separately in closed containments. Use a water spray to cool fully closed containers.

**Fire and explosion protection**
Do not spray on an open flame or any other incandescent material. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapors). Keep away from open flames, hot surfaces and sources of ignition.

**SDS Number:** 100000013849  
3/13
Hazardous decomposition products: Carbon Dioxide. Carbon oxides.

SECTION 6: Accidental release measures

Personal precautions: Use personal protective equipment. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Beware of vapors accumulating to form explosive concentrations. Vapors can accumulate in low areas.

Environmental precautions: Prevent product from entering drains. Prevent further leakage or spillage if safe to do so. If the product contaminates rivers and lakes or drains inform respective authorities.

Methods for cleaning up: Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).

SECTION 7: Handling and storage

Handling

Advice on safe handling: Avoid formation of aerosol. Do not breathe vapors/dust. Avoid exposure - obtain special instructions before use. For personal protection see section 8. Smoking, eating and drinking should be prohibited in the application area. Take precautionary measures against static discharges. Provide sufficient air exchange and/or exhaust in work rooms. Open drum carefully as content may be under pressure. Dispose of rinse water in accordance with local and national regulations.

Advice on protection against fire and explosion: Do not spray on an open flame or any other incandescent material. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapors). Keep away from open flames, hot surfaces and sources of ignition.

Storage

Requirements for storage areas and containers: No smoking. Keep container tightly closed in a dry and well-ventilated place. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Observe label precautions. Electrical installations / working materials must comply with the technological safety standards.

Engineering measures

Adequate ventilation to control airborne concentrations below the exposure guidelines/limits. Consider the potential hazards of this material (see Section 2), applicable exposure limits, job activities, and other substances in the work place when designing engineering controls and selecting personal protective equipment. If engineering controls or work practices are not adequate to prevent exposure to harmful levels of this material, the personal protective equipment listed below is recommended. The user should read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances.

Personal protective equipment

Respiratory protection : Wear a supplied-air NIOSH approved respirator unless ventilation or other engineering controls are adequate to maintain minimal oxygen content of 19.5% by volume under normal atmospheric pressure. Wear a NIOSH approved respirator that provides protection when working with this material if exposure to harmful levels of airborne material may occur, such as: Air-Purifying Respirator for Organic Vapors. Use a positive pressure, air-supplying respirator if there is potential for uncontrolled release, exposure levels are not known, or other circumstances where air-purifying respirators may not provide adequate protection.

Hand protection : The suitability for a specific workplace should be discussed with the producers of the protective gloves. Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time. Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.

Eye protection : Eye wash bottle with pure water. Tightly fitting safety goggles.

Skin and body protection : Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work-place. Wear as appropriate: Flame retardant antistatic protective clothing. Workers should wear antistatic footwear.

Hygiene measures : When using do not eat or drink. When using do not smoke. Wash hands before breaks and at the end of workday.

SECTION 9: Physical and chemical properties

Information on basic physical and chemical properties

Appearance

Form : Liquid
Physical state : Liquid
Color : Colorless at room temperature
Odor : Mild, Hydrocarbon

Safety data

Flash point : 39.4 °C (102.9 °F)
Method: Tag closed cup

Lower explosion limit : No data available
Upper explosion limit : No data available
Oxidizing properties : no

Autoignition temperature : 336 °C (637 °F)
Molecular formula : UVCB
Molecular weight : Not applicable
pH : Not applicable
Pour point : No data available

Boiling point/boiling range : 148.8 - 176.7 °C (299.8 - 350.1 °F)
Vapor pressure : 6.18 MMHG
at 38 °C (100 °F)
Relative density : 0.75
at 15.6 °C (60.1 °F)

Water solubility : Negligible
Partition coefficient: n-octanol/water : No data available
Relative vapor density : 4.5
(Air = 1.0)
Evaporation rate : 1
Percent volatile : > 99 %

SECTION 10: Stability and reactivity

Reactivity : No decomposition if stored and applied as directed.

Chemical stability : No decomposition if stored and applied as directed.

Possibility of hazardous reactions

Conditions to avoid : Heat, flames and sparks.
Materials to avoid : May react with oxygen and strong oxidizing agents, such as chlorates, nitrates, peroxides, etc.
Hazardous decomposition products : Carbon Dioxide
Carbon oxides
Other data : No decomposition if stored and applied as directed.

SECTION 11: Toxicological information

Acute oral toxicity
C9-C11 Isoalkanes : LD50: > 5,000 mg/kg
Species: Rat
Sex: male and female
Method: OECD Test Guideline 401
Information given is based on data obtained from similar substances.

Acute inhalation toxicity
C9-C11 Isoalkanes : LC50: > 4.9 mg/l
Exposure time: 4 h
Species: Rat
Sex: male and female
Test atmosphere: vapor
Method: OECD Test Guideline 403
An LC50/inhalation/4h/rat could not be determined because no mortality of rats was observed at the maximum achievable concentration.
Information given is based on data obtained from similar substances.

Acute dermal toxicity
C9-C11 Isoalkanes : LD50: > 5,000 mg/kg
Species: Rabbit
Sex: male and female
Method: OECD Test Guideline 402
Information given is based on data obtained from similar substances.

Skin irritation
C9-C11 Isoalkanes : May irritate skin.

Eye irritation
C9-C11 Isoalkanes : No eye irritation

Sensitization
C9-C11 Isoalkanes : Not a skin sensitizer.
Information given is based on data obtained from similar substances.

Repeated dose toxicity
C9-C11 Isoalkanes : Species: Rat, male and female
Sex: male and female
Application Route: Inhalation
Dose: 0, 2600, 5200, 10400 mg/3
Exposure time: 13 wk
## Alkylate 105

### Number of exposures: 6 h/d, 5 d/wk

**NOEL:** > 10,400 mg/m³  
**Method:** OECD Test Guideline 413  
No significant adverse effects were reported  
Information given is based on data obtained from similar substances.

### Developmental Toxicity

C9-C11 Isoalkanes  
**Species:** Rat  
**Application Route:** Inhalation  
**Dose:** 0, 291, 817 ppm  
**Number of exposures:** 6 h/d  
**Test period:** GD 6-15  
**NOAEL Teratogenicity:** > 817 ppm  
**NOAEL Maternal:** > 817 ppm

### Alkylate 105 Aspiration toxicity

May be fatal if swallowed and enters airways.

### Alkylate 105 Further information

Concentrations substantially above the TLV value may cause narcotic effects. Solvents may degrease the skin.

### SECTION 12: Ecological information

#### Toxicity to fish

C9-C11 Isoalkanes  
**LL50:** 3.6 mg/l  
**Exposure time:** 96 h  
**Species:** Oncorhynchus mykiss (rainbow trout)  
semi-static test  
**Method:** OECD Test Guideline 203  
Information given is based on data obtained from similar substances.

#### Toxicity to daphnia and other aquatic invertebrates

C9-C11 Isoalkanes  
**EL50:** 22 - 46 mg/l  
**Exposure time:** 48 h  
**Species:** Daphnia magna (Water flea)  
static test  
**Method:** OECD Test Guideline 202  
Information given is based on data obtained from similar substances.

#### Toxicity to algae

C9-C11 Isoalkanes  
**Erl50:** > 1,000 mg/l  
**Exposure time:** 72 h  
**Species:** Pseudokirchneriella subcapitata (algae)  
static test  
**Method:** OECD Test Guideline 201

#### Toxicity to fish (Chronic toxicity)
SAFETY DATA SHEET

Alkylate 105

Version 2.1

Revision Date 2018-05-31

C9-C11 Isoalkanes: NOELR: 0.132 mg/l
Species: Oncorhynchus mykiss (rainbow trout)
Method: QSAR modeled data

Biodegradability

C9-C11 Isoalkanes: aerobic
53 %
Testing period: 28 d
Method: OECD Test Guideline 301F
This material is not expected to be readily biodegradable.
Expected to be inherently biodegradable.
Information given is based on data obtained from similar substances.

Ecotoxicology Assessment

Acute aquatic toxicity
C9-C11 Isoalkanes: Toxic to aquatic life.

Chronic aquatic toxicity
C9-C11 Isoalkanes: Toxic to aquatic life with long lasting effects.

Additional ecological information: Toxic to aquatic life with long lasting effects.

SECTION 13: Disposal considerations

The information in this SDS pertains only to the product as shipped.

Use material for its intended purpose or recycle if possible. This material, if it must be discarded, may meet the criteria of a hazardous waste as defined by US EPA under RCRA (40 CFR 261) or other State and local regulations. Measurement of certain physical properties and analysis for regulated components may be necessary to make a correct determination. If this material is classified as a hazardous waste, federal law requires disposal at a licensed hazardous waste disposal facility.

Product: The product should not be allowed to enter drains, water courses or the soil. Do not contaminate ponds, waterways or ditches with chemical or used container. Send to a licensed waste management company.

Contaminated packaging: Empty remaining contents. Dispose of as unused product. Do not re-use empty containers. Do not burn, or use a cutting torch on, the empty drum.

SECTION 14: Transport information

The shipping descriptions shown here are for bulk shipments only, and may not apply to shipments in non-bulk packages (see regulatory definition).

Consult the appropriate domestic or international mode-specific and quantity-specific Dangerous Goods Regulations for additional shipping description requirements (e.g., technical name or names, etc.) Therefore, the information shown here, may not always agree with the bill of lading shipping description for the material. Flashpoints for the material may vary slightly between the SDS and the bill of lading.
