SECTION 1: Identification of the substance/mixture and of the company/undertaking

Product information
Product Name : Scentinel® T-50 Gas Odorant
Material : 1120360, 1101267, 1094321, 1090052, 1095293, 1098466, 1101268, 1024726, 1024725
Use : Odorant
Company : Chevron Phillips Chemical Company LP
Specialty Chemicals
10001 Six Pines Drive
The Woodlands, TX 77380

ODOR-FADE WARNING

A GAS LEAK CAN CAUSE A FIRE OR EXPLOSION RESULTING IN SERIOUS INJURY OR DEATH.

Be aware that the stenching chemical added to gas to make it detectable may not warn of a gas leak or the presence of propane or natural gas to all persons in every instance.

Instances where the odorant in an odorized gas may be undetectable include:

- Odor intensity may fade or be eliminated for a variety of chemical and physical causes, including the oxidation of rusting pipes, adsorption into or sticking onto the interior of pipes or appliances, or absorption into liquids.
- Contact with soil in underground leaks may de-odorize or remove odorant from the gas.
- Some people have a diminished ability, or inability to smell the stench. Factors that negatively
affect a person’s sense of smell include age, gender, medical conditions, and alcohol/tobacco usage.  
• The stench of odorized gas may not awaken sleeping persons.  
• Other odors may mask or hide the stench.  
• Exposure to the odor for even a short period of time, may cause nasal fatigue, where a person can no longer smell the stench.

Gas detectors listed by the Underwriters Laboratories (UL) can be used as an extra measure of safety for detecting gas leaks, especially under conditions where the odorant alone may not provide an adequate warning. Gas detectors emit a loud, shrill sound when gas is present and do not depend on sense of smell. Because the odor intensity can fade or people may have problems with their sense of smell, we recommend installing, per manufacturer’s instructions, one or more combustible gas detectors, in suitable locations to ensure adequate coverage to detect gas leaks.

Educate yourself, your employees, and your customers with the content of this warning and other important facts associated with the so-called “odor-fade phenomenon.”

SECTION 2: Hazards identification

Classification of the substance or mixture
This product has been classified in accordance with the hazard communication standard 29 CFR 1910.1200; the SDS and labels contain all the information as required by the standard.

Classification
: Flammable liquids, Category 2  
Skin irritation, Category 2  
Eye irritation, Category 2A  
Skin sensitization, Category 1

Labeling

Symbol(s) : 

Signal Word : Danger

Hazard Statements : H225: Highly flammable liquid and vapor.  
H315: Causes skin irritation.  
H317: May cause an allergic skin reaction.  
H319: Causes serious eye irritation.

Precautionary Statements :  
Prevention:  
P210 Keep away from heat/sparks/open flames/hot surfaces.  
No smoking.  
P233 Keep container tightly closed.  
P240 Ground/bond container and receiving equipment.  
P241 Use explosion-proof electrical/ventilating/lighting/equipment.  
P242 Use only non-sparking tools.  
P243 Take precautionary measures against static discharge.  
P261 Avoid breathing dust/fume/gas/mist/vapors/spray.  
P264 Wash skin thoroughly after handling.  
P272 Contaminated work clothing must not be allowed out of the workplace.  
P280 Wear protective gloves/eye protection/face protection.

Response:
P303 + P361 + P353  IF ON SKIN (or hair): Remove/ Take off immediately all contaminated clothing. Rinse skin with water/ shower.
P305 + P351 + P338  IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P333 + P313  If skin irritation or rash occurs: Get medical advice/ attention.
P337 + P313  If eye irritation persists: Get medical advice/ attention.
P362  Take off contaminated clothing and wash before reuse.
P370 + P378  In case of fire: Use dry sand, dry chemical or alcohol-resistant foam for extinction.

Storage:
P403 + P235  Store in a well-ventilated place. Keep cool.

Disposal:
P501  Dispose of contents/ container to an approved waste disposal plant.

Carcinogenicity:

IARC
No ingredient of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.

NTP
No ingredient of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.

ACGIH
No ingredient of this product present at levels greater than or equal to 0.1% is identified as a carcinogen or potential carcinogen by ACGIH.

SECTION 3: Composition/information on ingredients

Synonyms : Gas Odorant
Molecular formula : Mixture

</table>

SECTION 4: First aid measures

General advice : Move out of dangerous area. Show this material safety data sheet to the doctor in attendance.

If inhaled : Move to fresh air. If symptoms persist, call a physician.

In case of skin contact : If skin irritation persists, call a physician. If on skin, rinse well with water. If on clothes, remove clothes.

In case of eye contact : Immediately flush eye(s) with plenty of water. Remove contact lenses. Protect unharmed eye. Keep eye wide open while
If swallowed: Keep respiratory tract clear. Do NOT induce vomiting. Never give anything by mouth to an unconscious person. Take victim immediately to hospital.

SECTION 5: Firefighting measures

- **Flash point**: 15 °C (59 °F)  
  Method: Tagliabue Open Cup
- **Autoignition temperature**: 200 °C (392 °F)
- **Suitable extinguishing media**: Alcohol-resistant foam. Carbon dioxide (CO2). Dry chemical.
- **Unsuitable extinguishing media**: High volume water jet.
- **Specific hazards during fire fighting**: Do not allow run-off from fire fighting to enter drains or water courses.
- **Special protective equipment for fire-fighters**: Wear self-contained breathing apparatus for firefighting if necessary.
- **Further information**: Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. For safety reasons in case of fire, cans should be stored separately in closed containments. Use a water spray to cool fully closed containers.
- **Fire and explosion protection**: Do not spray on an open flame or any other incandescent material. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapors). Use only explosion-proof equipment. Keep away from open flames, hot surfaces and sources of ignition.
- **Hazardous decomposition products**: Sulfur. Sulfur oxides.

SECTION 6: Accidental release measures

- **Personal precautions**: Use personal protective equipment. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Beware of vapors accumulating to form explosive concentrations. Vapors can accumulate in low areas.
- **Environmental precautions**: Prevent product from entering drains. Prevent further leakage or spillage if safe to do so. If the product contaminates rivers and lakes or drains inform respective authorities.
- **Methods for cleaning up**: Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth,
vermiculite) and place in container for disposal according to local / national regulations (see section 13).

SECTION 7: Handling and storage

Handling

Advice on safe handling: Avoid formation of aerosol. Do not breathe vapors/dust. Avoid exposure - obtain special instructions before use. Avoid contact with skin and eyes. For personal protection see section 8. Smoking, eating and drinking should be prohibited in the application area. Take precautionary measures against static discharges. Provide sufficient air exchange and/or exhaust in work rooms. Open drum carefully as content may be under pressure. Dispose of rinse water in accordance with local and national regulations. Persons susceptible to skin sensitization problems or asthma, allergies, chronic or recurrent respiratory disease should not be employed in any process in which this mixture is being used.

Advice on protection against fire and explosion: Do not spray on an open flame or any other incandescent material. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapors). Use only explosion-proof equipment. Keep away from open flames, hot surfaces and sources of ignition.

Storage

Requirements for storage areas and containers: No smoking. Keep container tightly closed in a dry and well-ventilated place. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Observe label precautions. Electrical installations / working materials must comply with the technological safety standards.

Engineering measures

Adequate ventilation to control airborne concentrations below the exposure guidelines/limits. Consider the potential hazards of this material (see Section 2), applicable exposure limits, job activities, and other substances in the work place when designing engineering controls and selecting personal protective equipment. If engineering controls or work practices are not adequate to prevent exposure to harmful levels of this material, the personal protective equipment listed below is recommended. The user should read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances.

Personal protective equipment

Respiratory protection: Wear a supplied-air NIOSH approved respirator unless
ventilation or other engineering controls are adequate to maintain minimal oxygen content of 19.5% by volume under normal atmospheric pressure. Wear a NIOSH approved respirator that provides protection when working with this material if exposure to harmful levels of airborne material may occur, such as: Air-Purifying Respirator for Organic Vapors. Use a positive pressure, air-supplying respirator if there is potential for uncontrolled release, exposure levels are not known, or other circumstances where air-purifying respirators may not provide adequate protection.

Hand protection: The suitability for a specific workplace should be discussed with the producers of the protective gloves. Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time. Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.

Eye protection: Eye wash bottle with pure water. Tightly fitting safety goggles. Wear face-shield and protective suit for abnormal processing problems.

Skin and body protection: Choose body protection according to the amount and concentration of the dangerous substance at the work place. Wear as appropriate: Flame retardant antistatic protective clothing. Remove and wash contaminated clothing before re-use. Workers should wear antistatic footwear.

Hygiene measures: When using do not eat or drink. When using do not smoke. Wash hands before breaks and at the end of workday.

SECTION 9: Physical and chemical properties

Information on basic physical and chemical properties

**Appearance**

Form: Liquid
Physical state: Liquid
Color: Colorless
Odor: Pungent

**Safety data**

Flash point: 15 °C (59 °F)
Method: Tagliabue Open Cup

Lower explosion limit: No data available
Upper explosion limit: No data available
Oxidizing properties: no

Autoignition temperature: 200 °C (392 °F)
Molecular formula: Mixture
Molecular weight: Not applicable
**Scentinel® T-50 Gas Odorant**

**SECTION 10: Stability and reactivity**

**Chemical stability**: This material is considered stable under normal ambient and anticipated storage and handling conditions of temperature and pressure.

**Possibility of hazardous reactions**

**Conditions to avoid**: Heat, flames and sparks.

**Materials to avoid**: May react with oxygen and strong oxidizing agents, such as chlorates, nitrates, peroxides, etc.

**Hazardous decomposition products**: Sulfur

**Other data**: No decomposition if stored and applied as directed.

**SECTION 11: Toxicological information**

**Scentinel® T-50 Gas Odorant**

**Acute oral toxicity**: LD50: 2,660 mg/kg

**Method**: Acute toxicity estimate

Number of exposures: Daily  
NOAEL Teratogenicity: 50 mg/kg bw /day  
NOAEL Maternal: 200 mg/kg bw /day  

**Scentinel® T-50 Gas Odorant**  
**Aspiration toxicity**  : May be harmful if swallowed and enters airways.  
**CMR effects**  
**Tetrahydrothiophene**  : Mutagenicity: Tests on bacterial or mammalian cell cultures did not show mutagenic effects.  
Teratogenicity: Animal testing did not show any effects on fetal development.  
Reproductive toxicity: Animal testing did not show any effects on fertility.  
**t-Butyl Mercaptan**  Carcinogenicity: Not available  
Mutagenicity: Did not show mutagenic effects in animal experiments.  
Teratogenicity: Did not show teratogenic effects in animal experiments.  
Reproductive toxicity: No toxicity to reproduction  

**Scentinel® T-50 Gas Odorant**  
**Further information**  : Solvents may degrease the skin.  

**SECTION 12: Ecological information**  

**Toxicity to fish**  
**Tetrahydrothiophene**  : LC50: > 24 mg/l  
Exposure time: 96 h  
Species: Danio rerio (Zebra Fish)  
Method: OECD Test Guideline 203  
**t-Butyl Mercaptan**  : LC50: 34 mg/l  
Exposure time: 96 h  
Species: Oncorhynchus mykiss (rainbow trout)  
semi-static test Method: OECD Test Guideline 203  

**Toxicity to daphnia and other aquatic invertebrates**  
**Tetrahydrothiophene**  : EC50: 24 mg/l  
Exposure time: 48 h
### Toxicity to algae

**Tetrahydrothiophene**
- EC50: > 153.2 mg/l  
  - Exposure time: 72 h  
  - Species: *Pseudokirchneriella subcapitata* (green algae)  
  - Method: OECD Test Guideline 201

**t-Butyl Mercaptan**
- EC50: 24 mg/l  
  - Exposure time: 72 h  
  - Species: *Pseudokirchneriella subcapitata* (green algae)  
  - Method: OECD Test Guideline 201

### Toxicity to bacteria

**Tetrahydrothiophene**
- EC50: 1,530 mg/l  
  - Exposure time: 3 h  
  - Respiration inhibition  
  - Method: OECD Test Guideline 209

### Bioaccumulation

**Tetrahydrothiophene**: Bioaccumulation is unlikely.

**t-Butyl Mercaptan**: Bioconcentration factor (BCF): 12  
  - Bioaccumulation is unlikely.

### Biodegradability

**Tetrahydrothiophene**: < 10 %  
  - According to the results of tests of biodegradability this product is not readily biodegradable.

**t-Butyl Mercaptan**: aerobic  
  - Result: Not readily biodegradable.  
  - 6 %  
  - Testing period: 63 d  
  - Method: OECD Test Guideline 301

### Ecotoxicology Assessment

**Acute aquatic toxicity**
- *t-Butyl Mercaptan*: Toxic to aquatic life.

SAFETY DATA SHEET

Scentinel® T-50 Gas Odorant

Version 3.0
Revision Date 2018-07-02

Tetrahydrothiophene : Harmful to aquatic life with long lasting effects.
t-Butyl Mercaptan : Toxic to aquatic life with long lasting effects.

Results of PBT assessment
Tetrahydrothiophene : Non-classified PBT substance, Non-classified vPvB substance
t-Butyl Mercaptan : Non-classified PBT substance, Non-classified vPvB substance

Additional ecological information
: Toxic to aquatic life with long lasting effects.

SECTION 13: Disposal considerations

The information in this SDS pertains only to the product as shipped.

Use material for its intended purpose or recycle if possible. This material, if it must be discarded, may meet the criteria of a hazardous waste as defined by US EPA under RCRA (40 CFR 261) or other State and local regulations. Measurement of certain physical properties and analysis for regulated components may be necessary to make a correct determination. If this material is classified as a hazardous waste, federal law requires disposal at a licensed hazardous waste disposal facility.

Product : The product should not be allowed to enter drains, water courses or the soil. Do not contaminate ponds, waterways or ditches with chemical or used container. Send to a licensed waste management company.

Contaminated packaging : Empty remaining contents. Dispose of as unused product. Do not re-use empty containers. Do not burn, or use a cutting torch on, the empty drum.

SECTION 14: Transport information

The shipping descriptions shown here are for bulk shipments only, and may not apply to shipments in non-bulk packages (see regulatory definition).

Consult the appropriate domestic or international mode-specific and quantity-specific Dangerous Goods Regulations for additional shipping description requirements (e.g., technical name or names, etc.) Therefore, the information shown here, may not always agree with the bill of lading shipping description for the material. Flashpoints for the material may vary slightly between the SDS and the bill of lading.

Pennsylvania Right To Know: t-Butyl Mercaptan - 75-66-1

New Jersey Right To Know: Tetrahydrothiophene - 110-01-0
t-Butyl Mercaptan - 75-66-1

California Prop. 65 Ingredients: This product does not contain any chemicals known to the State of California to cause cancer, birth, or any other reproductive defects.

Notification status

Europe REACH: On the inventory, or in compliance with the inventory
United States of America (USA) TSCA: On the inventory, or in compliance with the inventory
Canada DSL: On the inventory, or in compliance with the inventory
Australia AICS: On the inventory, or in compliance with the inventory
New Zealand NZIoC: On the inventory, or in compliance with the inventory
Japan ENCS: On the inventory, or in compliance with the inventory
Korea KECI: On the inventory, or in compliance with the inventory
Philippines PICCS: On the inventory, or in compliance with the inventory
China IECSC: On the inventory, or in compliance with the inventory

SDS Number:100000013852 14/16
NFPA Classification:
- Health Hazard: 2
- Fire Hazard: 3
- Reactivity Hazard: 0

Further information
- Legacy SDS Number: 387280

Significant changes since the last version are highlighted in the margin. This version replaces all previous versions.

The information in this SDS pertains only to the product as shipped.

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

| Key or legend to abbreviations and acronyms used in the safety data sheet |
|-----------------------------------------------|----------------------|--------------------------------|
| ACGIH                                        | American Conference of Government Industrial Hygienists | LD50  | Lethal Dose 50% |
| AICS                                         | Australia, Inventory of Chemical Substances | LOAEL | Lowest Observed Adverse Effect Level |
| DSL                                          | Canada, Domestic Substances List | NFPA  | National Fire Protection Agency |
| NDSL                                         | Canada, Non-Domestic Substances List | NIOSH | National Institute for Occupational Safety & Health |
| CNS                                          | Central Nervous System | NTP   | National Toxicology Program |
| CAS                                          | Chemical Abstract Service | NZIoC | New Zealand Inventory of Chemicals |
| EC50                                         | Effective Concentration | NOAEL | No Observable Adverse Effect Level |
| EC50                                         | Effective Concentration 50% | NOEC  | No Observed Effect Concentration |
| EGEST                                        | EOSCA Generic Exposure Scenario Tool | OSHA  | Occupational Safety & Health Administration |
| EOSCA                                        | European Oilfield Specialty Chemicals Association | PEL   | Permissible Exposure Limit |
| EINECS                                       | European Inventory of Existing Chemical Substances | PICCS | Philippines Inventory of Commercial Chemical Substances |
| MAK                                          | Germany Maximum Concentration Values | PRNT  | Presumed Not Toxic |
| GHS                                          | Globally Harmonized System | RCRA  | Resource Conservation Recovery Act |
| >=                                           | Greater Than or Equal To | STEL  | Short-term Exposure Limit |
| IC50                                         | Inhibition Concentration 50% | SARA  | Superfund Amendments and Reauthorization Act. |
| IARC                                         | International Agency for Research on Cancer | TLV   | Threshold Limit Value |
