SECTION 1: Identification of the substance/mixture and of the company/undertaking

Product information

Product Name: D-2887 Gas-Oil Reference Standard
Material: 1017424, 1017425, 1017426

Company: Chevron Phillips Chemical Company LP
10001 Six Pines Drive
The Woodlands, TX 77380

Local: Chevron Phillips Chemicals International N.V.
Airport Plaza (Stockholm Building)
Leonardo Da Vinci Laan 19
1831 Diegem
Belgium

SDS Requests: (800) 852-5530

SECTION 2: Hazards identification

Classification of the substance or mixture
REGULATION (EC) No 1272/2008

SDS Number:100000014069
Flammable liquids, Category 3  
Acute toxicity, Category 4  
Carcinogenicity, Category 1B  
Reproductive toxicity, Category 2  
Specific target organ systemic toxicity - repeated exposure, Category 2, Liver  
Aspiration hazard, Category 1  
Acute aquatic toxicity, Category 1  
Chronic aquatic toxicity, Category 1  

```
H226: Flammable liquid and vapor.
H304: May be fatal if swallowed and enters airways.
H332: Harmful if inhaled.
H350: May cause cancer.
H361: Suspected of damaging fertility or the unborn child.
H373: May cause damage to organs through prolonged or repeated exposure in contact with skin.
H304: May be fatal if swallowed and enters airways.
H400: Very toxic to aquatic life.
H410: Very toxic to aquatic life with long lasting effects.
```

Label elements

Labeling (REGULATION (EC) No 1272/2008)

Hazard pictograms: ![Pictograms](image)

Signal Word: Danger

Hazard Statements:

- H226: Flammable liquid and vapor.
- H304: May be fatal if swallowed and enters airways.
- H332: Harmful if inhaled.
- H350: May cause cancer.
- H361: Suspected of damaging fertility or the unborn child.
- H373: May cause damage to organs (Liver) through prolonged or repeated exposure in contact with skin.
- H410: Very toxic to aquatic life with long lasting effects.

Precautionary Statements:

**Prevention:**
- P201: Obtain special instructions before use.
- P210: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
- P260: Do not breathe dust/fume/gas/mist/vapor/spray.
- P273: Avoid release to the environment.
- P280: Wear protective gloves/ protective clothing/ eye protection/ face protection.

**Response:**
- P301 + P310: IF SWALLOWED: Immediately call a POISON CENTER/doctor.
- P308 + P313: IF exposed or concerned: Get medical advice/ attention.
- P331: Do NOT induce vomiting.
D-2887 Gas-Oil Reference Standard

Synonyms: None Established

Molecular formula: UVCB

For the full text of the H-Statements mentioned in this Section, see Section 16.

SECTION 4: First aid measures

General advice: Move out of dangerous area. Show this material safety data sheet to the doctor in attendance. Material may produce a serious, potentially fatal pneumonia if swallowed or vomited.

If inhaled: Consult a physician after significant exposure. If unconscious, place in recovery position and seek medical advice.

In case of skin contact: If skin irritation persists, call a physician. If on skin, rinse well with water. If on clothes, remove clothes.

In case of eye contact: Flush eyes with water as a precaution. Remove contact lenses. Protect unharmed eye. Keep eye wide open while rinsing. If eye irritation persists, consult a specialist.

If swallowed: Keep respiratory tract clear. Never give anything by mouth to an unconscious person. If symptoms persist, call a physician. Take victim immediately to hospital.
SECTION 5: Firefighting measures

- **Flash point**: 50 °C (122 °F) Method: Tag closed cup
- **Autoignition temperature**: No data available
- **Suitable extinguishing media**: Alcohol-resistant foam. Carbon dioxide (CO2). Dry chemical.
- **Unsuitable extinguishing media**: High volume water jet.
- **Specific hazards during firefighting**: Do not allow run-off from fire fighting to enter drains or water courses.
- **Special protective equipment for fire-fighters**: Wear self-contained breathing apparatus for firefighting if necessary.
- **Further information**: Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. For safety reasons in case of fire, cans should be stored separately in closed containments. Use a water spray to cool fully closed containers.
- **Fire and explosion protection**: Do not spray on an open flame or any other incandescent material. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapors). Keep away from open flames, hot surfaces and sources of ignition.
- **Hazardous decomposition products**: Hydrocarbons. Carbon oxides.

SECTION 6: Accidental release measures

- **Personal precautions**: Use personal protective equipment. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Beware of vapors accumulating to form explosive concentrations. Vapors can accumulate in low areas.
- **Environmental precautions**: Prevent product from entering drains. Prevent further leakage or spillage if safe to do so. If the product contaminates rivers and lakes or drains inform respective authorities.
- **Methods for cleaning up**: Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).

SECTION 7: Handling and storage

**Handling**
Advice on safe handling: Avoid formation of aerosol. Do not breathe vapors/dust. Avoid exposure - obtain special instructions before use. Avoid contact with skin and eyes. For personal protection see section 8. Smoking, eating and drinking should be prohibited in the application area. Take precautionary measures against static discharges. Provide sufficient air exchange and/or exhaust in work rooms. Open drum carefully as content may be under pressure. Dispose of rinse water in accordance with local and national regulations.

Advice on protection against fire and explosion: Do not spray on an open flame or any other incandescent material. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapors). Keep away from open flames, hot surfaces and sources of ignition.

Storage

Requirements for storage areas and containers: No smoking. Keep container tightly closed in a dry and well-ventilated place. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Observe label precautions. Electrical installations / working materials must comply with the technological safety standards.

SECTION 8: Exposure controls/personal protection

Engineering measures

Adequate ventilation to control airborne concentrations below the exposure guidelines/limits. Consider the potential hazards of this material (see Section 2), applicable exposure limits, job activities, and other substances in the work place when designing engineering controls and selecting personal protective equipment. If engineering controls or work practices are not adequate to prevent exposure to harmful levels of this material, the personal protective equipment listed below is recommended. The user should read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances.

Personal protective equipment

Respiratory protection: Wear a supplied-air NIOSH approved respirator unless ventilation or other engineering controls are adequate to maintain minimal oxygen content of 19.5% by volume under normal atmospheric pressure. Wear a NIOSH approved respirator that provides protection when working with this material if exposure to harmful levels of airborne material may occur, such as: Air-Purifying Respirator for Organic Vapors, Dusts and Mists. Use a positive pressure, air-supplying respirator if there is potential for uncontrolled release, exposure levels are not known, or other circumstances where air-purifying respirators may not provide adequate protection.
Hand protection: The suitability for a specific workplace should be discussed with the producers of the protective gloves. Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time. Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.

Eye protection: Eye wash bottle with pure water. Tightly fitting safety goggles.

Skin and body protection: Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific workplace. Wear as appropriate: Flame retardant antistatic protective clothing. Workers should wear antistatic footwear.

Hygiene measures: When using do not eat or drink. When using do not smoke. Wash hands before breaks and at the end of workday.

### SECTION 9: Physical and chemical properties

Vapor pressure : No data available
Relative density : 0.848
at 16 °C (61 °F)
Density : No data available
Water solubility : Negligible
Partition coefficient: n-octanol/water : No data available
Viscosity, kinematic : 3.9 mm2/s
at 40 °C (104 °F)
Relative vapor density : 3
(Air = 1.0)
Evaporation rate : < 1

SECTION 10: Stability and reactivity

Chemical stability : This material is considered stable under normal ambient and anticipated storage and handling conditions of temperature and pressure.

Possibility of hazardous reactions

Conditions to avoid : Heat, flames and sparks.
Materials to avoid : May react with oxygen and strong oxidizing agents, such as chlorates, nitrates, peroxides, etc.
Hazardous decomposition products : Hydrocarbons
Carbon oxides

Other data : No decomposition if stored and applied as directed.

SECTION 11: Toxicological information

Acute oral toxicity
Gas Oil, Full Range : LD50: 5.270 mg/kg
Species: Rat
Sex: male
Method: OECD Test Guideline 401
LD50: 4.320 mg/kg
Species: Rat
Sex: female
Method: OECD Test Guideline 401

Acute inhalation toxicity
## D-2887 Gas-Oil Reference Standard

### Skin irritation

May cause skin irritation and/or dermatitis.

### Eye irritation

Vapors may cause irritation to the eyes, respiratory system and the skin.

### Sensitization

Did not cause sensitization on laboratory animals. Information given is based on data obtained from similar substances.

### Repeated dose toxicity

- **Species:** Rat, Male and female
- **Sex:** Male and female
- **Application Route:** Dermal
- **Dose:** 1.06, 10.6, 53, 106, 530 mg/kg
- **Exposure time:** 13 wk
- **Number of exposures:** 6 hrs occluded, 5 days/wk
- **NOEL:** 1,06 mg/kg
- **Test substance:** yes
- **Target Organs:** Liver

### Developmental Toxicity

- **Species:** Rat
- **Application Route:** Dermal
- **Dose:** 0. 8, 30, 125, 500 mg/kg
- **Number of exposures:** daily
- **Test period:** GD 0-19
- **Test substance:** yes
- **NOAEL Teratogenicity:** 0.05 mg/kg
- **NOAEL Maternal:** 0.05 mg/kg

### Aspiration toxicity

May be fatal if swallowed and enters airways.

### CMR effects

- **Carcinogenicity:** Possible human carcinogen
- **Reproductive toxicity:** Some evidence of adverse effects on sexual function and fertility, and/or on development, based on animal experiments.

### Further information

Solvents may degrease the skin.
SECTION 12: Ecological information

Toxicity to fish
Gas Oil, Full Range : LL50: 79 mg/l
                      Exposure time: 96 h
                      Species: Salmo gairdneri (Rainbow trout)
                      semi-static test Method: OECD Test Guideline 203

Toxicity to daphnia and other aquatic invertebrates
Gas Oil, Full Range : EL50: 0,22 mg/l
                      Exposure time: 48 h
                      Species: Daphnia magna (Water flea)
                      static test Method: OECD Test Guideline 202

Toxicity to algae
Gas Oil, Full Range : ErL50: 0,32 mg/l
                      Exposure time: 72 h
                      Species: Pseudokirchneriella subcapitata (algae)
                      static test Method: OECD Test Guideline 201

M-Factor
Gas oils (petroleum), heavy atmospheric : M-Factor (Acute Aquat. Tox.) 1
                                           M-Factor (Chron. Aquat. Tox.) 1

Elimination information (persistence and degradability)
Biodegradability : This material is not expected to be readily biodegradable.

Ecotoxicology Assessment
Acute aquatic toxicity
Gas Oil, Full Range : Very toxic to aquatic life.

Chronic aquatic toxicity
Gas Oil, Full Range : Very toxic to aquatic life with long lasting effects.

Results of PBT assessment : This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

Additional ecological information : Very toxic to aquatic life with long lasting effects.

SECTION 13: Disposal considerations

The information in this SDS pertains only to the product as shipped.
Use material for its intended purpose or recycle if possible. This material, if it must be discarded, may meet the criteria of a hazardous waste as defined by US EPA under RCRA (40 CFR 261) or other State and local regulations. Measurement of certain physical properties and analysis for regulated components may be necessary to make a correct determination. If this material is classified as a hazardous waste, federal law requires disposal at a licensed hazardous waste disposal facility.

Product: The product should not be allowed to enter drains, water courses or the soil. Do not contaminate ponds, waterways or ditches with chemical or used container. Send to a licensed waste management company.

Contaminated packaging: Empty remaining contents. Dispose of as unused product. Do not re-use empty containers. Do not burn, or use a cutting torch on, the empty drum.

SECTION 14: Transport information

The shipping descriptions shown here are for bulk shipments only, and may not apply to shipments in non-bulk packages (see regulatory definition).

Consult the appropriate domestic or international mode-specific and quantity-specific Dangerous Goods Regulations for additional shipping description requirements (e.g., technical name or names, etc.) Therefore, the information shown here, may not always agree with the bill of lading shipping description for the material. Flashpoints for the material may vary slightly between the SDS and the bill of lading.

- **China IECSC**: Not in compliance with the inventory
**NFPA Classification**

- Health Hazard: 1
- Fire Hazard: 2
- Reactivity Hazard: 0

**Further information**

Legacy SDS Number: 46830

Significant changes since the last version are highlighted in the margin. This version replaces all previous versions.

The information in this SDS pertains only to the product as shipped.

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.
