SAFETY DATA SHEET

Di-(2-Hydroxyethyl) Disulfide

Version 1.6

Revision Date 2018-05-30

SECTION 1: Identification of the substance/mixture and of the company/undertaking

Product information

Product Name : Di-(2-Hydroxyethyl) Disulfide
Material : 1121425, 1116603, 1107391, 1088334, 1077080, 1070368, 1079211, 1086445, 1086807, 1077079, 1097790, 1027449, 1024827

EC-No. Registration number

</tr>
</tbody>
</table>

Relevant Identified Uses Supported : Intermediate: The substance is registered as a Transported Isolated Intermediate with Strictly Controlled Conditions (SCC) defined in Article 18(4) of Regulation EC No. 1907/2006 and must therefore be handled as such.

Company

Chevron Phillips Chemical Company LP
Specialty Chemicals
10001 Six Pines Drive
The Woodlands, TX 77380

Local

Chevron Phillips Chemicals International N.V.
Airport Plaza (Stockholm Building)
Leonardo Da Vinci Laan 19
1831 Diegem
Belgium

SECTION 2: Hazards identification

Classification of the substance or mixture
REGULATION (EC) No 1272/2008

- Acute toxicity, Category 3: H301: Toxic if swallowed.
- Acute toxicity, Category 3: H311: Toxic in contact with skin.
- Eye irritation, Category 2: H319: Causes serious eye irritation.
- Skin sensitization, Category 1B: H317: May cause an allergic skin reaction.
- Specific target organ systemic toxicity - repeated exposure, Category 2: H373: May cause damage to organs through prolonged or repeated exposure.
- Chronic aquatic toxicity, Category 2: H411: Toxic to aquatic life with long lasting effects.

Label elements
Labeling (REGULATION (EC) No 1272/2008)

- Hazard pictograms:
- Signal Word: Danger
- Hazard Statements:
  - H301 + H311: Toxic if swallowed or in contact with skin.
  - H317: May cause an allergic skin reaction.
  - H319: Causes serious eye irritation.
  - H373: May cause damage to organs through prolonged or repeated exposure.
  - H411: Toxic to aquatic life with long lasting effects.

Precautionary Statements:

- Prevention: P273
- P280
- Response: P301 + P310 + P330
  - IF SWALLOWED: Immediately call a POISON CENTER/doctor. Rinse mouth.
  - Wash contaminated clothing before reuse.
Di-(2-Hydroxyethyl) Disulfide

Hazardous ingredients which must be listed on the label:
- 1892-29-1 Dithiodiglycol

Additional Labeling:
The following percentage of the mixture consists of ingredient(s) with unknown acute toxicity: 5%
The following percentage of the mixture consists of ingredient(s) with unknown hazards to the aquatic environment: 5%

SECTION 3: Composition/information on ingredients

| Synonyms | Dithiodiglycol DiHEDS |
| Molecular formula | C4H10O2S2 |

For the full text of the H-Statements mentioned in this Section, see Section 16.

SECTION 4: First aid measures

General advice: Move out of dangerous area. Consult a physician. Show this material safety data sheet to the doctor in attendance.

If inhaled: If unconscious, place in recovery position and seek medical advice. If symptoms persist, call a physician.

In case of skin contact: If on skin, rinse well with water.

In case of eye contact: Immediately flush eye(s) with plenty of water. Remove contact lenses. Protect unharmed eye. Keep eye wide open while rinsing. If eye irritation persists, consult a specialist.

If swallowed: Keep respiratory tract clear. Do not give milk or alcoholic beverages. Never give anything by mouth to an unconscious person. If symptoms persist, call a physician.
### SECTION 5: Firefighting measures

<table>
<thead>
<tr>

<tr>
<td>Environmental precautions</td>
<td>Prevent product from entering drains. Prevent further leakage or spillage if safe to do so. If the product contaminates rivers and lakes or drains inform respective authorities.</td>
</tr>
<tr>
<td>Methods for cleaning up</td>
<td>Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust). Keep in suitable, closed containers for disposal.</td>
</tr>
</tbody>
</table>

### SECTION 7: Handling and storage

#### Handling

| Advice on safe handling                        | Do not breathe vapors/dust. Avoid exposure - obtain special instructions before use. Avoid contact with skin and eyes. For personal protection see section 8. Smoking, eating and drinking should be prohibited in the application area. Dispose of rinse water in accordance with local and national regulations. Persons susceptible to skin sensitization problems or asthma, allergies, chronic or recurrent respiratory disease should not be employed in any process in which this mixture is being used. |
| Advice on protection against fire and explosion| Normal measures for preventive fire protection.                             |
Storage

Requirements for storage areas and containers: Keep container tightly closed in a dry and well-ventilated place. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Observe label precautions. Electrical installations / working materials must comply with the technological safety standards.

SECTION 8: Exposure controls/personal protection

Engineering measures

Adequate ventilation to control airborne concentrations below the exposure guidelines/limits. Consider the potential hazards of this material (see Section 2), applicable exposure limits, job activities, and other substances in the work place when designing engineering controls and selecting personal protective equipment. If engineering controls or work practices are not adequate to prevent exposure to harmful levels of this material, the personal protective equipment listed below is recommended. The user should read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances.

Personal protective equipment

Respiratory protection: Wear a supplied-air NIOSH approved respirator unless ventilation or other engineering controls are adequate to maintain minimal oxygen content of 19.5% by volume under normal atmospheric pressure. Wear a NIOSH approved respirator that provides protection when working with this material if exposure to harmful levels of airborne material may occur, such as: Use a positive pressure, air-supplying respirator if there is potential for uncontrolled release, exposure levels are not known, or other circumstances where air-purifying respirators may not provide adequate protection.

Hand protection: The suitability for a specific workplace should be discussed with the producers of the protective gloves. Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time. Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.

Eye protection: Eye wash bottle with pure water.

Skin and body protection: Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work-place. Wear as appropriate: Personal protection through wearing a tightly closed chemical protection suit and a self-contained breathing apparatus. Remove and wash contaminated clothing before re-use. Skin should be washed after contact. Footwear protecting against chemicals.

Hygiene measures: Avoid contact with skin, eyes and clothing. When using do not eat or drink. When using do not smoke. Wash hands before breaks and immediately after handling the product.
In case of an accident during maintenance/cleaning, this substance must be handled under Strictly Controlled Conditions (SCC) in accordance with REACH regulation Article 18(4) for transported isolated intermediates.

### SECTION 9: Physical and chemical properties

#### Information on basic physical and chemical properties

**Appearance**
- **Form**: Liquid
- **Physical state**: Liquid
- **Color**: Colorless to light yellow
- **Odor**: Pungent

**Safety data**
- **Flash point**: Not applicable
- **Lower explosion limit**: No data available
- **Upper explosion limit**: No data available
- **Oxidizing properties**: No
- **Autoignition temperature**: 285 °C (545 °F)
  - **Method**: EU Method A.15
- **Molecular formula**: C4H10O2S2
- **Molecular weight**: 154,26 g/mol
- **pH**: Not applicable
- **Freezing point**: 5 °C (41 °F)
- **Boiling point/boiling range**: Not applicable
- **Vapor pressure**: 0,00 Pa
  - **at 37,8 °C (100,0 °F)**
  - **Method**: OECD Test Guideline 104 estimated
- **Relative density**: 1,25
  - **at 15,6 °C (60,1 °F)**
- **Density**: 1,29 G/ML
- **Water solubility**: > 1,000 g/l
  - **at 20 °C (68 °F)**
  - **Method**: OECD Test Guideline 105
- **Partition coefficient: n-octanol/water**: log Pow: -0,3
  - **at 20 °C (68 °F)**
  - **Method**: OECD Test Guideline 107
- **Viscosity, kinematic**: 50 cSt
Di-(2-Hydroxyethyl) Disulfide

Relative vapor density: 2.69 (Air = 1.0) at 40 °C (104 °F)
Evaporation rate: No data available
Percent volatile: > 99 %

SECTION 10: Stability and reactivity

Chemical stability: This material is considered stable under normal ambient and anticipated storage and handling conditions of temperature and pressure.

Possibility of hazardous reactions
Conditions to avoid: No data available.
Materials to avoid: Avoid oxidizing agents.
Hazardous decomposition products: Carbon oxides Sulfur oxides

Other data: No decomposition if stored and applied as directed.

SECTION 11: Toxicological information

Acute oral toxicity
Dithiodiglycol: LD50: 376 mg/kg
Species: Rat
Sex: male
Method: OECD Test Guideline 401

LD50: 173 mg/kg
Species: Rat
Sex: female
Method: OECD Test Guideline 401

Acute inhalation toxicity
Dithiodiglycol: LC50: > 10,1 mg/l
Exposure time: 4 h
Species: Rat
Sex: male and female
Test atmosphere: vapor

Acute dermal toxicity
Dithiodiglycol: LD50: 516 mg/kg
Species: Rabbit
Sex: male and female
Di-(2-Hydroxyethyl) Disulfide

Method: OECD Test Guideline 402

Skin irritation
Dithiodiglycol : No skin irritation

Eye irritation
Dithiodiglycol : Eye irritation

Sensitization
Dithiodiglycol : The product is a skin sensitizer, sub-category 1B.

Repeated dose toxicity
Dithiodiglycol : Species: Rat, male
                      Sex: male
                      Application Route: oral gavage
                      Dose: 0, 5, 20, 75 mg/kg
                      Exposure time: 30 d
                      Number of exposures: Daily
                      NOEL: 20 mg/kg
                      Lowest observable effect level: 75 mg/kg
                      Method: OECD Guideline 422
                      Target Organs: Kidney, Liver

                      Species: Rat, female
                      Sex: female
                      Application Route: oral gavage
                      Dose: 0, 5, 20, 75 mg/kg
                      Exposure time: 42 d
                      Number of exposures: Daily
                      NOEL: 20 mg/kg
                      Method: OECD Guideline 422

Reproductive toxicity
Dithiodiglycol : Species: Rat
                      Sex: male
                      Application Route: oral gavage
                      Dose: 0, 5, 20, 75 mg/kg bw
                      Exposure time: 30 d
                      Number of exposures: Daily
                      Method: OECD Guideline 422
                      NOAEL Parent: 20 mg/kg
                      NOAEL F1: 20 mg/kg
                      Fertility and developmental toxicity tests did not reveal any effect on reproduction.
Di-(2-Hydroxyethyl) Disulfide

Species: Rat  
Sex: female  
Application Route: oral gavage  
Dose: 0, 5, 20, 75 mg/kg bw  
Exposure time: 42 d  
Number of exposures: Daily  
Method: OECD Guideline 422  
NOAEL Parent: 20 mg/kg  
NOAEL F1: 20 mg/kg  
Fertility and developmental toxicity tests did not reveal any effect on reproduction.

Di-(2-Hydroxyethyl) Disulfide  
Aspiration toxicity: No aspiration toxicity classification.

Di-(2-Hydroxyethyl) Disulfide  
Further information: Solvents may degrease the skin.

SECTION 12: Ecological information

Toxicity to fish

Dithiodiglycol  
LC50: > 100 mg/l  
Exposure time: 96 h  
Species: Cyprinus carpio (Carp)  
static test Method: OECD Test Guideline 203

Toxicity to daphnia and other aquatic invertebrates

Dithiodiglycol  
EC50: 4.4 mg/l  
Exposure time: 48 h  
Species: Daphnia magna (Water flea)  
static test Method: OECD Test Guideline 202

Toxicity to algae

Dithiodiglycol  
ErC50: > 100 mg/l  
Exposure time: 72 h  
Species: Pseudokirchneriella subcapitata (algae)  
Growth inhibition Method: OECD Test Guideline 201

EyC50: 45 mg/l  
Exposure time: 72 h  
Species: Pseudokirchneriella subcapitata (algae)  
Growth inhibition Method: OECD Test Guideline 201

Toxicity to bacteria

Dithiodiglycol  
EC50: 612 mg/l  
Exposure time: 3 h  
Growth rate  
Species: Bacteria  
Respiration inhibition  
Method: OECD Test Guideline 209
Biodegradability

Dithiodiglycol : aerobic
Result: Not readily biodegradable.
20 %
Testing period: 28 d
Method: OECD Test Guideline 310

Ecotoxicology Assessment

Acute aquatic toxicity
Dithiodiglycol : Toxic to aquatic life.

Chronic aquatic toxicity
Dithiodiglycol : Toxic to aquatic life with long lasting effects.

Results of PBT assessment : This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

Additional ecological information : Toxic to aquatic life with long lasting effects.

SECTION 13: Disposal considerations

The information in this SDS pertains only to the product as shipped.

Use material for its intended purpose or recycle if possible. This material, if it must be discarded, may meet the criteria of a hazardous waste as defined by US EPA under RCRA (40 CFR 261) or other State and local regulations. Measurement of certain physical properties and analysis for regulated components may be necessary to make a correct determination. If this material is classified as a hazardous waste, federal law requires disposal at a licensed hazardous waste disposal facility.

Product : The product should not be allowed to enter drains, water courses or the soil. Do not contaminate ponds, waterways or ditches with chemical or used container. Send to a licensed waste management company.

Contaminated packaging : Empty remaining contents. Dispose of as unused product. Do not re-use empty containers.

SECTION 14: Transport information

The shipping descriptions shown here are for bulk shipments only, and may not apply to shipments in non-bulk packages (see regulatory definition).

Consult the appropriate domestic or international mode-specific and quantity-specific Dangerous Goods Regulations for additional shipping description requirements (e.g., technical name or names, etc.) Therefore, the information shown here, may not always agree with the bill of lading shipping description for the material. Flashpoints for the material may vary slightly between the SDS and the bill of lading.

SECTION 16: Other information

NFPA Classification
- Health Hazard: 2
- Fire Hazard: 1
- Reactivity Hazard: 0

Further information
- Legacy SDS Number: 96130

Significant changes since the last version are highlighted in the margin. This version replaces all previous versions.

The information in this SDS pertains only to the product as shipped.

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.
