SECTION 1: Identification of the substance/mixture and of the company/undertaking

**Product information**

Product Name: Jet A Aviation Fuel  
Material: 1102484, 1103429, 1102481, 1103418, 1102485, 1102483, 1102482, 1024254, 1024255, 1024256, 1024257, 1104981, 1104992

**Use**: Fuel

**Company**: Chevron Phillips Chemical Company LP  
Specialty Chemicals  
10001 Six Pines Drive  
The Woodlands, TX 77380

**Emergency telephone:**

**Health**:  
866.442.9628 (North America)  
1.832.813.4984 (International)

**Transport**:  
CHEMTREC 800.424.9300 or 703.527.3887(int'l)  
Asia: CHEMWATCH (+612 9186 1132) China: 0532 8388 9090  
EUROPE: BIG +32.14.584545 (phone) or +32.14583516 (telefax)

**Responsible Department**: Product Safety and Toxicology Group  
**E-mail address**: SDS@CPChem.com  
**Website**: www.CPChem.com

SECTION 2: Hazards identification

**Classification of the substance or mixture**

This product has been classified in accordance with the hazard communication standard 29 CFR 1910.1200; the SDS and labels contain all the information as required by the standard.

**Classification**:  
- Flammable liquids, Category 3  
- Skin irritation, Category 2  
- Carcinogenicity, Category 2  
- Specific target organ systemic toxicity - single exposure,
SAFETY DATA SHEET

Jet A Aviation Fuel

Version 2.4

Revision Date 2019-05-02

Category 3, Central nervous system
Specific target organ systemic toxicity - repeated exposure,
Category 1, Eyes, Blood
Aspiration hazard, Category 1

Labeling

Symbol(s):

Signal Word: Danger

Hazard Statements:
H226: Flammable liquid and vapor.
H304: May be fatal if swallowed and enters airways.
H315: Causes skin irritation.
H336: May cause drowsiness or dizziness.
H351: Suspected of causing cancer.
H372: Causes damage to organs (Eyes, Blood) through prolonged or repeated exposure.

Precautionary Statements:

Prevention:
P201 Obtain special instructions before use.
P202 Do not handle until all safety precautions have been read and understood.
P210 Keep away from heat/sparks/open flames/hot surfaces. No smoking.
P233 Keep container tightly closed.
P234 Ground/bond container and receiving equipment.
P240 Use explosion-proof electrical/ventilating/lighting/equipment.
P242 Use only non-sparking tools.
P243 Take precautionary measures against static discharge.
P260 Do not breathe dust/fume/gas/mist/vapor/spray.
P264 Wash skin thoroughly after handling.
P270 Do not eat, drink or smoke when using this product.
P271 Use only outdoors or in a well-ventilated area.
P280 Wear protective gloves/protective clothing/eye protection/face protection.

Response:
P301 + P310 IF SWALLOWED: Immediately call a POISON CENTER/doctor.
P303 + P361 + P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower.
P304 + P340 + P312 IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER/doctor if you feel unwell.
P308 + P313 IF exposed or concerned: Get medical advice/attention.
P331 Do NOT induce vomiting.
P332 + P313 If skin irritation occurs: Get medical advice/attention.
P362 Take off contaminated clothing and wash before reuse.
P370 + P378 In case of fire: Use dry sand, dry chemical or alcohol-resistant foam to extinguish.

Storage:
P403 + P233 Store in a well-ventilated place. Keep container
Jet A Aviation Fuel

Carcinogenicity:

IARC  Group 2B: Possibly carcinogenic to humans
Naphthalene  91-20-3

NTP  Reasonably anticipated to be a human carcinogen
Naphthalene  91-20-3

SECTION 4: First aid measures

General advice: Move out of dangerous area. Show this material safety data sheet to the doctor in attendance. Material may produce a serious, potentially fatal pneumonia if swallowed or vomited.

If inhaled: Consult a physician after significant exposure. If unconscious, place in recovery position and seek medical advice.

In case of skin contact: If skin irritation persists, call a physician. If on skin, rinse well with water. If on clothes, remove clothes.

In case of eye contact: Flush eyes with water as a precaution. Remove contact lenses. Protect unharmed eye. Keep eye wide open while rinsing. If eye irritation persists, consult a specialist.

If swallowed: Keep respiratory tract clear. Never give anything by mouth to an unconscious person. If symptoms persist, call a physician. Take victim immediately to hospital.

SECTION 5: Firefighting measures

Flash point: 37.8 °C (100.0 °F)
### Jet A Aviation Fuel

**Autoignition temperature**: 210 °C (410 °F)

**Suitable extinguishing media**: Alcohol-resistant foam. Carbon dioxide (CO2). Dry chemical.

**Unsuitable extinguishing media**: High volume water jet.

**Specific hazards during fire fighting**: Do not allow run-off from fire fighting to enter drains or water courses.

**Special protective equipment for fire-fighters**: Wear self-contained breathing apparatus for firefighting if necessary.

**Further information**: Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. For safety reasons in case of fire, cans should be stored separately in closed containments. Use a water spray to cool fully closed containers.

**Fire and explosion protection**: Do not spray on an open flame or any other incandescent material. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapors). Keep away from open flames, hot surfaces and sources of ignition.

**Hazardous decomposition products**: Hydrocarbons. Carbon oxides.

### SECTION 6: Accidental release measures

**Personal precautions**: Use personal protective equipment. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Beware of vapors accumulating to form explosive concentrations. Vapors can accumulate in low areas.

**Environmental precautions**: Prevent product from entering drains. Prevent further leakage or spillage if safe to do so. If the product contaminates rivers and lakes or drains inform respective authorities.

**Methods for cleaning up**: Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).

### SECTION 7: Handling and storage

**Handling**

**Advice on safe handling**: Avoid formation of aerosol. Do not breathe vapors/dust. Avoid exposure - obtain special instructions before use. Avoid contact with skin and eyes. For personal protection see section 8. Smoking, eating and drinking should be prohibited.
in the application area. Take precautionary measures against static discharges. Provide sufficient air exchange and/or exhaust in work rooms. Open drum carefully as content may be under pressure. Dispose of rinse water in accordance with local and national regulations.

Advice on protection against fire and explosion: Do not spray on an open flame or any other incandescent material. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapors). Keep away from open flames, hot surfaces and sources of ignition.

Storage

Requirements for storage areas and containers: No smoking. Keep container tightly closed in a dry and well-ventilated place. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Observe label precautions. Electrical installations / working materials must comply with the technological safety standards.

Use: Fuel

Engineering measures

Adequate ventilation to control airborne concentrations below the exposure guidelines/limits.

SDS Number: 100000014588 5/15
Consider the potential hazards of this material (see Section 2), applicable exposure limits, job activities, and other substances in the workplace when designing engineering controls and selecting personal protective equipment. If engineering controls or work practices are not adequate to prevent exposure to harmful levels of this material, the personal protective equipment listed below is recommended. The user should read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances.

**Personal protective equipment**

**Respiratory protection**: Wear a supplied-air NIOSH approved respirator unless ventilation or other engineering controls are adequate to maintain minimal oxygen content of 19.5% by volume under normal atmospheric pressure. Wear a NIOSH approved respirator that provides protection when working with this material if exposure to harmful levels of airborne material may occur, such as: Air-Purifying Respirator for Organic Vapors. Use a positive pressure, air-supplying respirator if there is potential for uncontrolled release, exposure levels are not known, or other circumstances where air-purifying respirators may not provide adequate protection.

**Hand protection**: The suitability for a specific workplace should be discussed with the producers of the protective gloves. Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time. Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.

**Eye protection**: Eye wash bottle with pure water. Tightly fitting safety goggles.

**Skin and body protection**: Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific workplace. Wear as appropriate: Flame retardant antistatic protective clothing. Workers should wear antistatic footwear.

**Hygiene measures**: When using do not eat or drink. When using do not smoke. Wash hands before breaks and at the end of workday.

**SECTION 9: Physical and chemical properties**

**Information on basic physical and chemical properties**

**Appearance**
- Form: Liquid
- Physical state: Liquid
- Color: Clear light yellow

**Safety data**
- Flash point: 37.8 °C (100.0 °F)
- Lower explosion limit: 0.6 % (V)
- Upper explosion limit: 4.7 % (V)
- Oxidizing properties: No

### SECTION 10: Stability and reactivity

**Chemical stability**

This material is considered stable under normal ambient and anticipated storage and handling conditions of temperature and pressure.

**Possibility of hazardous reactions**

**Hazardous reactions**

Hazardous reactions: Hazardous polymerization does not occur.

Further information: No decomposition if stored and applied as directed.

Hazardous reactions: Vapors may form explosive mixture with air.

**Conditions to avoid**

Heat, flames and sparks.
**Jet A Aviation Fuel**

**Materials to avoid**: May react with oxygen and strong oxidizing agents, such as chlorates, nitrates, peroxides, etc.

**Hazardous decomposition products**: Hydrocarbons Carbon oxides

**Other data**: No decomposition if stored and applied as directed.

### SECTION 11: Toxicological information

**Jet A Aviation Fuel**

**Acute oral toxicity**: LD50: > 5,000 mg/kg
Species: Rat

**Acute inhalation toxicity**

Kerosene C9-C16: LC50: > 5.2 mg/l
Exposure time: 4 h
Species: Rat

**Acute dermal toxicity**

Kerosene C9-C16: LD50: >2000 milligram per kilogram
Species: Rabbit

**Jet A Aviation Fuel**

**Skin irritation**: May cause skin irritation in susceptible persons.

**Eye irritation**: Vapors may cause irritation to the eyes, respiratory system and the skin.

**Jet A Aviation Fuel**

**Sensitization**: No adverse effects expected.

**Repeated dose toxicity**

Kerosene C9-C16: Species: Rabbit
Application Route: Dermal
Dose: 0, 200, 1000, 2000 mg/kg
Exposure time: 28 day
Number of exposures: 3 times/wk
Lowest observable effect level: 1,000 mg/kg

**Genotoxicity in vitro**

Kerosene C9-C16: Test Type: Ames test
Result: negative

Test Type: Mouse lymphoma assay
Result: positive

Naphthalene: Test Type: Ames test
Result: negative
Test Type: Sister Chromatid Exchange Assay  
Result: negative

Test Type: Unscheduled DNA synthesis assay  
Result: negative

Genotoxicity in vivo

Kerosene C9-C16  :  Test Type: Cytogenetic assay  
Result: negative

Naphthalene  
Test Type: Mouse micronucleus assay  
Result: negative

Carcinogenicity

Kerosene C9-C16  :  Species: Mouse  
Dose: 0, 28.5, 50, 100%  
Exposure time: 104 wks  
Number of exposures: 2, 4, or 7 times/wk  
Remarks: Weak dermal carcinogen

Naphthalene  
Species: Mouse  
Sex: male  
Dose: 10, 30 ppm  
Exposure time: 105 weeks  
Number of exposures: 6 hours/day, 5 days/week  
Test substance: yes  
Print Date: No information available.  
Remarks: No evidence of carcinogenicity

Species: Mouse  
Sex: female  
Dose: 10, 30 ppm  
Exposure time: 105 weeks  
Number of exposures: 6 hours/day, 5 days/week  
Test substance: yes  
Print Date: No information available.  
Remarks: increased incidence of alveolar/bronchiolar adenomas

Species: Rat  
Sex: male and female  
Dose: 10, 30, 60 ppm  
Exposure time: 105 weeks  
Number of exposures: 6 hours/day, 5 days/week  
Test substance: yes  
Print Date: No information available.  
Remarks: nose respiratory epithelial adenoma, increased incidence of olfactory neuroblastomas

Developmental Toxicity

Kerosene C9-C16  :  Species: Rat  
Application Route: Inhalation  
Dose: 0, 106, 364 ppm  
Exposure time: 6 hrs/d
Test period: GD 6-15  
NOAEL Teratogenicity: 364 ppm  
NOAEL Maternal: 364 ppm  

Naphthalene  
Species: Rabbit  
Application Route: oral gavage  
Dose: 40, 200, 400 mg/kg  
Test period: 29 d, GD 6-18  
NOAEL Teratogenicity: 400 mg/kg  

Jet A Aviation Fuel  
Aspiration toxicity: May be fatal if swallowed and enters airways.  
Substances known to cause human aspiration toxicity hazards or to be regarded as if they cause human aspiration toxicity hazard.  

CMR effects  
Naphthalene: Carcinogenicity: Limited evidence of carcinogenicity in animal studies  

Jet A Aviation Fuel  
Further information: Symptoms of overexposure may be headache, dizziness, tiredness, nausea and vomiting. Concentrations substantially above the TLV value may cause narcotic effects. Solvents may degrease the skin.  

SECTION 12: Ecological information  

Toxicity to fish  
Kerosene C9-C16: LL50: 2 - 5 mg/l  
Exposure time: 96 h  
Species: Oncorhynchus mykiss (rainbow trout)  
Method: OECD Test Guideline 203  

Naphthalene: LC50: 3.2 mg/l  
Exposure time: 96 h  
Species: Pimephales promelas (fathead minnow)  

Toxicity to daphnia and other aquatic invertebrates  
Kerosene C9-C16: EL50: 1.4 mg/l  
Exposure time: 48 h  
Species: Daphnia magna (Water flea)  
Method: OECD Test Guideline 202  

Naphthalene: LC50: 2.16 mg/l  
Exposure time: 48 h  
Species: Daphnia magna (Water flea)  

Toxicity to algae  
Kerosene C9-C16: EL50: 1 - 3 mg/l
Exposure time: 72 h  
Species: Raphidocellus subcapitata (algae)  
Method: OECD Test Guideline 201

Naphthalene  
EC50: 2.96 mg/l  
Exposure time: 48 h  
Species: Selenastrum capricornutum (algae)

Biodegradability  
Expected to be ultimately biodegradable

Elimination information (persistence and degradability)  
Additional ecological information  
An environmental hazard cannot be excluded in the event of unprofessional handling or disposal., Toxic to aquatic life with long lasting effects.

Ecotoxicology Assessment

Short-term (acute) aquatic hazard  
Kerosene C9-C16  
Toxic to aquatic life.

Naphthalene  
Very toxic to aquatic life.

Long-term (chronic) aquatic hazard  
Kerosene C9-C16  
Toxic to aquatic life with long lasting effects.

Naphthalene  
Very toxic to aquatic life with long lasting effects.

SECTION 13: Disposal considerations

The information in this SDS pertains only to the product as shipped.  
Use material for its intended purpose or recycle if possible. This material, if it must be discarded, may meet the criteria of a hazardous waste as defined by US EPA under RCRA (40 CFR 261) or other State and local regulations. Measurement of certain physical properties and analysis for regulated components may be necessary to make a correct determination. If this material is classified as a hazardous waste, federal law requires disposal at a licensed hazardous waste disposal facility.

Product  
The product should not be allowed to enter drains, water courses or the soil. Do not contaminate ponds, waterways or ditches with chemical or used container. Send to a licensed waste management company.

Contaminated packaging  
Empty remaining contents. Dispose of as unused product. Do not re-use empty containers. Do not burn, or use a cutting torch on, the empty drum.

SECTION 14: Transport information

The shipping descriptions shown here are for bulk shipments only, and may not apply to shipments in non-bulk packages (see regulatory definition).

Consult the appropriate domestic or international mode-specific and quantity-specific Dangerous Goods Regulations for additional shipping description requirements (e.g., technical name or names, etc.) Therefore, the information shown here, may not always agree with the bill of lading shipping.
description for the material. Flashpoints for the material may vary slightly between the SDS and the bill of lading.
