SAFETY DATA SHEET

SOLTROL® 10 Isoparaffin Solvent

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1

Product information

Product Name: SOLTROL® 10 Isoparaffin Solvent
Material: 1089830, 1017316, 1017315, 1017318, 1017317, 1017319, 1017320, 1017321, 1017314

EC-No. Registration number

</table>

Relevant Identified Uses
Supported: Use as a fuel - industrial
           Use as a fuel – professional

1.3

Details of the supplier of the safety data sheet

Company: Chevron Phillips Chemical Company LP
          Specialty Chemicals
          10001 Six Pines Drive
          The Woodlands, TX 77380

Local: Chevron Phillips Chemicals International N.V.
       Airport Plaza (Stockholm Building)
       Leonardo Da Vincilaan 19
       1831 Diegem
       Belgium

SDS Requests: (800) 852-5530
Technical Information: (832) 813-4862
Responsible Party: Product Safety Group
Email: sds@cpchem.com

1.4

SDS Number: 100000067719
SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

REGULATION (EC) No 1272/2008

| Flammable liquids, Category 2 | H225: Highly flammable liquid and vapor. |
| Skin irritation, Category 2 | H315: Causes skin irritation. |
| Specific target organ systemic toxicity - single exposure, Category 3, Central nervous system | H336: May cause drowsiness or dizziness. |
| Aspiration hazard, Category 1 | H304: May be fatal if swallowed and enters airways. |
| Long-term (chronic) aquatic hazard, Category 2 | H411: Toxic to aquatic life with long lasting effects. |

2.2 Labeling (REGULATION (EC) No 1272/2008)

<table>
<thead>
<tr>
<th>Hazard pictograms</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="danger.png" alt="Signal Word: Danger" /></td>
</tr>
</tbody>
</table>

| Hazard Statements | | |
| --- | --- | |
| H225 | Highly flammable liquid and vapor. |
| H304 | May be fatal if swallowed and enters airways. |
| H315 | Causes skin irritation. |
| H336 | May cause drowsiness or dizziness. |
| H411 | Toxic to aquatic life with long lasting effects. |

<table>
<thead>

</tr>
</tbody>
</table>
Response:
P301 + P310 IF SWALLOWED: Immediately call a POISON CENTER/doctor.
P331 Do NOT induce vomiting.
Storage:
P403 + P235 Store in a well-ventilated place. Keep cool.

Hazardous ingredients which must be listed on the label:
- Hydrocarbons C7-C8, isoalkanes, < 2% aromatics

SECTION 3: Composition/information on ingredients

3.1 - 3.2 Substance or Mixture
Synonyms: Not Established
Molecular formula: UVCB

For the full text of the H-Statements mentioned in this Section, see Section 16.

SECTION 4: First aid measures

4.1 Description of first-aid measures

General advice: Move out of dangerous area. Show this material safety data sheet to the doctor in attendance. Symptoms of poisoning may appear several hours later. Do not leave the victim unattended.

If inhaled: Consult a physician after significant exposure. If unconscious, place in recovery position and seek medical advice.

In case of skin contact: If skin irritation persists, call a physician. If on skin, rinse well with water. If on clothes, remove clothes.

In case of eye contact: Flush eyes with water as a precaution. Remove contact lenses. Protect unharmed eye. Keep eye wide open while rinsing. If eye irritation persists, consult a specialist.

If swallowed: Keep respiratory tract clear. Never give anything by mouth to an unconscious person. If symptoms persist, call a physician.
SECTION 5: Firefighting measures

Flash point: -11 °C (12 °F)
Method: Tag closed cup

Autoignition temperature: 420 °C (788 °F)

5.1 Extinguishing media

Suitable extinguishing media: Alcohol-resistant foam. Carbon dioxide (CO2). Dry chemical.

Unsuitable extinguishing media: High volume water jet.

5.2 Special hazards arising from the substance or mixture

Specific hazards during fire fighting: Do not allow run-off from fire fighting to enter drains or water courses.

5.3 Advice for firefighters

Special protective equipment for fire-fighters: Wear self-contained breathing apparatus for firefighting if necessary.

Further information: Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. For safety reasons in case of fire, cans should be stored separately in closed containments. Use a water spray to cool fully closed containers.

Fire and explosion protection: Do not spray on an open flame or any other incandescent material. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapors). Use only explosion-proof equipment. Keep away from open flames, hot surfaces and sources of ignition.

Hazardous decomposition products: Carbon Dioxide. Carbon oxides.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions: Use personal protective equipment. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Beware of vapors accumulating to form explosive concentrations. Vapors can accumulate in low areas.

6.2 Environmental precautions
SOLTROL® 10 Isoparaffin Solvent

Environmental precautions: Prevent product from entering drains. Prevent further leakage or spillage if safe to do so. If the product contaminates rivers and lakes or drains inform respective authorities.

6.3 Methods and materials for containment and cleaning up
Methods for cleaning up: Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).

6.4 Reference to other sections
Reference to other sections: For personal protection see section 8. For disposal considerations see section 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling
Handling
Advice on safe handling: Avoid formation of aerosol. Do not breathe vapors/dust. Avoid exposure - obtain special instructions before use. Avoid contact with skin and eyes. For personal protection see section 8. Smoking, eating and drinking should be prohibited in the application area. Take precautionary measures against static discharges. Provide sufficient air exchange and/or exhaust in work rooms. Open drum carefully as content may be under pressure. Dispose of rinse water in accordance with local and national regulations.

Advice on protection against fire and explosion: Do not spray on an open flame or any other incandescent material. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapors). Use only explosion-proof equipment. Keep away from open flames, hot surfaces and sources of ignition.

7.2 Conditions for safe storage, including any incompatibilities
Storage
Requirements for storage areas and containers: No smoking. Keep container tightly closed in a dry and well-ventilated place. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Observe label precautions. Electrical installations / working materials must comply with the technological safety standards.

SECTION 8: Exposure controls/personal protection

8.1 Control parameters
Ingredients with workplace control parameters

SDS Number:100000067719 5/15
Components | Basis | Value | Control parameters | Note
--- | --- | --- | --- | ---
Hydrocarbons C7-C8, isoalkanes, <2% aromatics | Manufacturer | TWA | 300 ppm. |  

FR

Composants | Base | Valeur | Paramètres de contrôle | Note
--- | --- | --- | --- | ---
Hydrocarbons C7-C8, isoalkanes, <2% aromatics | FR VLE | VME | 1.000 mg/m³ | (14), (5), (6), normal, Vapeur
FR VLE | VLCT (VLE) | 1.500 mg/m³ | (14), (5), (6), normal, Vapeur

(14) Ces fractions d'hydrocarbures sont classées C1a et M1b sauf si elles contiennent moins de 1 % en poids de benzène
(5) Les valeurs spécifiques fixées pour les hydrocarbures nommément désignés dans la liste restent valables simultanément
(6) Une valeur d'objectif de 500 mg/m³ avait été prévue par la circulaire du 12 juillet 1993, elle devait être réexaminée en 1995 mais ne l'a pas été.

Valeurs limites indicatives

DNEL

Hydrocarbons C7-C8, isoalkanes, <2% aromatics : End Use: Workers
Routes of exposure: Inhalation
Potential health effects: Long-term systemic effects
Value: 2085 mg/m³

End Use: Workers
Routes of exposure: Dermal
Potential health effects: Acute local effects
Value: 300 mg/kg

End Use: Consumers
Routes of exposure: Inhalation
Potential health effects: Long-term systemic effects
Value: 447 mg/m³

End Use: Consumers
Routes of exposure: Dermal
Potential health effects: Long-term systemic effects
Value: 149 mg/kg

End Use: Consumers
Routes of exposure: Oral
Potential health effects: Long-term systemic effects
Value: 149 mg/kg

8.2 Exposure controls

Engineering measures

Adequate ventilation to control airborne concentrations below the exposure guidelines/limits. Consider the potential hazards of this material (see Section 2), applicable exposure limits, job activities, and other substances in the work place when designing engineering controls and selecting personal protective equipment. If engineering controls or work practices are not adequate to prevent exposure to harmful levels of this material, the personal protective equipment listed below is recommended. The user should read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances.

Personal protective equipment

Respiratory protection : Wear a supplied-air NIOSH approved respirator unless ventilation or other engineering controls are adequate to maintain minimal oxygen content of 19.5% by volume under normal atmospheric pressure. Wear a NIOSH approved...
respirator that provides protection when working with this material if exposure to harmful levels of airborne material may occur, such as: Air-Purifying Respirator for Organic Vapors. Use a positive pressure, air-supplying respirator if there is potential for uncontrolled release, exposure levels are not known, or other circumstances where air-purifying respirators may not provide adequate protection.

Hand protection: The suitability for a specific workplace should be discussed with the producers of the protective gloves. Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time. Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.

Eye protection: Eye wash bottle with pure water. Tightly fitting safety goggles.

Skin and body protection: Choose body protection according to the amount and concentration of the dangerous substance at the work place. Wear as appropriate: Protective suit. Safety shoes.

Hygiene measures: When using do not eat or drink. When using do not smoke. Wash hands before breaks and at the end of workday.

### SECTION 9: Physical and chemical properties

## SECTION 10: Stability and reactivity

### 10.1 Reactivity
- **Stable under recommended storage conditions.**

### 10.2 Chemical stability
- **This material is considered stable under normal ambient and anticipated storage and handling conditions of temperature and pressure.**

### 10.3 Possibility of hazardous reactions
- **Hazardous reactions:** Hazardous polymerization does not occur.
  - Further information: No decomposition if stored and applied as directed.
  - Further information: No hazards to be specially mentioned.
  - Hazardous reactions: Vapors may form explosive mixture with air.

### 10.4 Conditions to avoid
- **Heat, flames and sparks.**

### 10.5 Materials to avoid
- May react with oxygen and strong oxidizing agents, such as chlorates, nitrates, peroxides, etc.

### 10.6 Hazardous decomposition products
- Carbon Dioxide
- Carbon oxides
### SECTION 11: Toxicological information

#### 11.1 Information on toxicological effects

**Acute oral toxicity**

Genotoxicity in vitro
Hydrocarbons C7-C8, isoalkanes, < 2% aromatics: Test Type: Ames test
Result: negative

Reproductive toxicity
Hydrocarbons C7-C8, isoalkanes, < 2% aromatics: Species: Rat
Sex: male and female
Application Route: inhalation (vapor)
Number of exposures: 6 h/d; 5 d/wk
Method: OECD Test Guideline 416
NOAEL Parent: 10,560 mg/m3
NOAEL F1: 31,680 mg/m3
NOAEL F2: 31,680 mg/m3
Fertility and developmental toxicity tests did not reveal any effect on reproduction.
Information given is based on data obtained from similar substances.

Developmental Toxicity
Hydrocarbons C7-C8, isoalkanes, < 2% aromatics: Species: Rat
Application Route: Inhalation
Dose: 500, 2000, 7000 ppm
Exposure time: 6h/d
Test period: GD 6-15
Method: OECD Guideline 414
NOAEL Teratogenicity: > 21,000 mg/m3
NOAEL Maternal: > 21,000 mg/m3
Animal testing did not show any effects on fetal development.
Information given is based on data obtained from similar substances.

SOLTROL® 10 Isoparaffin Solvent
Aspiration toxicity: May be fatal if swallowed and enters airways.

CMR effects
Hydrocarbons C7-C8, isoalkanes, < 2% aromatics: Carcinogenicity: Not available
Mutagenicity: In vitro tests did not show mutagenic effects
Reproductive toxicity: No evidence of adverse effects on sexual function and fertility, or on development, based on animal experiments.

SOLTROL® 10 Isoparaffin Solvent
Further information: Symptoms of overexposure may be headache, dizziness, tiredness, nausea and vomiting. Concentrations substantially above the TLV value may cause narcotic effects. Solvents may degrease the skin.

SECTION 12: Ecological information
Toxicity

Ecotoxicity effects

Toxicity to fish

Hydrocarbons C7-C8, isoalkanes, < 2% aromatics: LC50: 5.4 mg/l
Exposure time: 96 h
Species: Oncorhynchus mykiss (rainbow trout)
Method: OECD Test Guideline 203
Information given is based on data obtained from similar substances.

Toxicity to daphnia and other aquatic invertebrates

Hydrocarbons C7-C8, isoalkanes, < 2% aromatics: EL50: 143 mg/l
Exposure time: 48 h
Species: Daphnia magna (Water flea)
Method: OECD Test Guideline 202

Toxicity to algae

Hydrocarbons C7-C8, isoalkanes, < 2% aromatics: EL50: 29.0 mg/l
Exposure time: 72 h
Species: Raphidocellus subcapitata (algae)
Method: OECD Test Guideline 201

Toxicity to fish (Chronic toxicity)

Hydrocarbons C7-C8, isoalkanes, < 2% aromatics: NOELR: 0.778 mg/l
Exposure time: 28 d
Species: Oncorhynchus mykiss (rainbow trout)
Method: QSAR modeled data

Toxicity to daphnia and other aquatic invertebrates (Chronic toxicity)

Hydrocarbons C7-C8, isoalkanes, < 2% aromatics: NOELR: 1 mg/l
Exposure time: 21 d
Species: Daphnia magna (Water flea)
Method: OECD Test Guideline 211
Information given is based on data obtained from similar substances.

12.2 Persistence and degradability

Biodegradability

Hydrocarbons C7-C8, isoalkanes, < 2% aromatics: Result: Not readily biodegradable.
60 %
Testing period: 60 d
Method: OECD Test Guideline 301F
Expected to be inherently biodegradable.
Information given is based on data obtained from similar substances.
12.3 Bioaccumulative potential
Elimination information (persistence and degradability)

Bioaccumulation

Hydrocarbons C7-C8, isoalkanes, < 2% aromatics

This material is not expected to bioaccumulate.

12.4 Mobility in soil

Mobility

Medium: Air
Method: Calculation, Mackay Level III Fugacity Model
Content: 100 %

12.5 Results of PBT and vPvB assessment
Results of PBT assessment

This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

12.6 Other adverse effects
Additional ecological information

Ecotoxicology Assessment

Short-term (acute) aquatic hazard
Hydrocarbons C7-C8, isoalkanes, < 2% aromatics

Toxic to aquatic life.

Long-term (chronic) aquatic hazard
Hydrocarbons C7-C8, isoalkanes, < 2% aromatics

Toxic to aquatic life with long lasting effects.

SECTION 13: Disposal considerations

13.1 Waste treatment methods
The information in this SDS pertains only to the product as shipped.

Use material for its intended purpose or recycle if possible. This material, if it must be discarded, may meet the criteria of a hazardous waste as defined by US EPA under RCRA (40 CFR 261) or other State and local regulations. Measurement of certain physical properties and analysis for regulated components may be necessary to make a correct determination. If this material is classified as a hazardous waste, federal law requires disposal at a licensed hazardous waste disposal facility.

Product

The product should not be allowed to enter drains, water courses or the soil. Do not contaminate ponds, waterways or ditches with chemical or used container. Send to a licensed waste management company.

Contaminated packaging

Empty remaining contents. Dispose of as unused product. Do not re-use empty containers. Do not burn, or use a cutting torch on, the empty drum.
SECTION 14: Transport information

14.1 - 14.7
Transport information
The shipping descriptions shown here are for bulk shipments only, and may not apply to shipments in non-bulk packages (see regulatory definition).

Consult the appropriate domestic or international mode-specific and quantity-specific Dangerous Goods Regulations for additional shipping description requirements (e.g., technical name or names, etc.) Therefore, the information shown here, may not always agree with the bill of lading shipping description for the material. Flashpoints for the material may vary slightly between the SDS and the bill of lading.

**Further information**

Legacy SDS Number: 34750

Significant changes since the last version are highlighted in the margin. This version replaces all previous versions.

The information in this SDS pertains only to the product as shipped.

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.
Full text of H-Statements referred to under sections 2 and 3.

H225 Highly flammable liquid and vapor.
H304 May be fatal if swallowed and enters airways.
H315 Causes skin irritation.
H336 May cause drowsiness or dizziness.
H411 Toxic to aquatic life with long lasting effects.
