

## PAO 4FG

Version 2.9

Revision Date 2024-05-02

According to Regulation (EC) No. 1907/2006, Regulation (EC) No. 2020/878

SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1 Product identifier

#### **Product information**

Product Name	:	PAO 4FG
Material	:	1111728

#### EC-No.Registration number

Chemical name	CAS-No. EC-No. Index No.	Legal Entity Registration number
1-Decene, Trimer,	157707-86-3	Chevron Phillips Chemical Company LP
Hydrogenated	500-393-3	01-2119486452-34-0000
1-Decene, Trimer,	157707-86-3	Chevron Phillips Chemicals International NV
Hydrogenated	500-393-3	01-2119486452-34-0006

#### 1.2

#### Relevant identified uses of the substance or mixture and uses advised against

Relevant Identified Uses         Supported         1.3         Details of the supplier of the	Use as an intermediate Formulation Use in coatings – industrial Use in coatings – professional Use in Coatings - Consumer Lubricants - Industrial Lubricants - Professional Lubricants - Consumer Metal working fluids / rolling oils - Industrial Metal working fluids / rolling oils – Professional Functional Fluids - Industrial Functional Fluids - Professional Functional Fluids - Consumer Use in polymer production – industrial Agrochemical uses Other consumer uses
Company	: Chevron Phillips Chemical Company LP
SDS Number:100000101305	1/14

### PAO 4FG

Version 2.9

Revision Date 2024-05-02

Reference to other sections : For personal protection see section 8. For disposal considerations see section 13. A quantitative risk assessment is not required for the environment. A quantitative risk assessment is not required for human health.

#### SECTION 7: Handling and storage

#### 7.1

# Precautions for safe handling Handling

Advice on safe handling	:	Do not breathe vapors/dust. For personal protection see section 8. Smoking, eating and drinking should be prohibited in the application area. Dispose of rinse water in accordance with local and national regulations.
Advice on protection against fire and explosion	:	Normal measures for preventive fire protection.

#### 7.2

Conditions for safe storage, including any incompatibilities

#### Storage

#### SECTION 8: Exposure controls/personal protection

#### 8.2

#### Exposure controls Engineering measures

Adequate ventilation to control airborned concentrations below the exposure guidelines/limits. Consider the potential hazards of this material (see Section 2), applicable exposure limits, job activities, and other substances in the work place when designing engineering controls and selecting personal protective equipment. If engineering controls or work practices are not adequate to prevent exposure to harmful levels of this material, the personal protective equipment listed below is recommended. The user should read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances.

#### Personal protective equipment

Respiratory protection : If ventilation or other engineering controls are not adequate to maintain minimal oxygen content of 19.5% by volume under normal atmospheric pressure, a supplied-air NIOSH approved respirator may be appropriate. If exposure to harmful levels of airborne material may occur, a NIOSH approved respirator that provides protection may be appropriate, such as:. Air-Purifying Respirator for Dusts and Mists / P100. A positive pressure, air-supplying respirator may be appropriate if there is potential for uncontrolled release, aerosolization, exposure levels are not known, or other circumstances where air-purifying respirators

SDS Number:100000101305

Version 2.9	Revision Date 2	2024-05-02
	may not provide adequate protection.	
Hand protection	The suitability for a specific workplace should be discuss with the producers of the protective gloves. Please obse the instructions regarding permeability and breakthrough which are provided by the supplier of the gloves. Also tal consideration the specific local conditions under which th product is used, such as the danger of cuts, abrasion, ar contact time. Gloves should be discarded and replaced is any indication of degradation or chemical breakthroug	erve a time ke into ne nd the if there
Eye protection	Eye wash bottle with pure water. Tightly fitting safety go	ggles.
Skin and body protection	Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and specific work-place. Wear as appropriate:. Protective su Safety shoes.	
Hygiene measures	When using do not eat or drink. When using do not smo Wash hands before breaks and at the end of workday.	ke.
	is not required for the environment. is not required for human health.

Version 2.9

SAFETY DATA SHEET

Revision Date 2024-05-02

PAO 4FG Eye irritation	:	No eye irritation
PAO 4FG Sensitization	:	Did not cause sensitization on laboratory animals.
PAO 4FG Repeated dose toxicity	:	Dose: PUBLIC: REG_WORLD Exposure time: Mutagenicity (Salmonella typhi Number of exposures: yes No adverse effects expected
PAO 4FG Genotoxicity in vitro	:	Test Type: Ames test Metabolic activation: with and without metabolic activation Method: Mutagenicity (Salmonella typhimurium - reverse mutation assay) Result: negative
PAO 4FG Genotoxicity in vivo	:	Remarks: Not classified due to data which are conclusive although insufficient for classification., Based on data from similar materials
PAO 4FG Reproductive toxicity	:	Animal testing did not show any effects on fertility. Based on data from similar materials
PAO 4FG Developmental Toxicity	:	Animal testing did not show any effects on fetal development. Information given is based on data obtained from similar substances.
PAO 4FG Aspiration toxicity Toxicology Assessment	:	May be fatal if swallowed and enters airways. Substances known to cause human aspiration toxicity hazards or to be regarded as if they cause human aspiration toxicity hazard.
PAO 4FG Specific Target Organ Toxicity (Single Exposure)	:	Remarks: Not classified due to data which are conclusive although insufficient for classification.
PAO 4FG Specific Target Organ Toxicity (Repeated Exposure)	:	Remarks: Not classified due to data which are conclusive although insufficient for classification.

	SAFETY DATA SHEET			
PAO 4FG				
Version 2.9	Revision Date 2024-05-02			
12.5 Results of PBT and vPvB as				
Results of PBT assessment	: This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.			
12.6				
Endocrine disrupting prope	rties			
Endocrine disrupting properties	<ul> <li>The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.</li> </ul>			
12.7 Other adverse effects				
Additional ecological information 12.8	: No data available			
Additional Information				
Ecotoxicology Assessment				
Short-term (acute) aquatic hazard	: This material is not expected to be harmful to aquatic organisms.			
Long-term (chronic) aquatic hazard	: This material is not expected to be harmful to aquatic organisms.			
SECTION 13: Disposal considerations				
13.1 Waste treatment methods				
	ertains only to the product as shipped.			

Use material for its intended purpose or recycle if possible. This material, if it must be discarded, may meet the criteria of a hazardous waste as defined by US EPA under RCRA (40 CFR 261) or other State and local regulations. Measurement of certain physical properties and analysis for regulated components may be necessary to make a correct determination. If this material is classified as a hazardous waste, federal law requires disposal at a licensed hazardous waste disposal facility.

Product	Do not dispose of waste into sewer. Do not contam ponds, waterways or ditches with chemical or used Send to a licensed waste management company.		
Contaminated packaging	Empty remaining contents. Dispose of as unused p Do not re-use empty containers.	roduct.	
A quantitative risk assessment is not required for the environment.			

A quantitative risk assessment is not required for the environment. A quantitative risk assessment is not required for human health.
