research facilities globally

Our Sustainability Focus

Our sustainability focal points span three main areas of our impact: **People, Planet and Performance**. We embraced progress in 2019, showing our concentrated efforts in creating a better, more sustainable future.

People

▶ ICARE 2.0 for Impact

Enhanced diversity and inclusion program to focus on putting principles into practice.

▶ Process Safety Performance

Lowest ever Process Safety Event Rate.

▶ VPP Star Status

Achieved OSHA's Voluntary Protection Program Star Status at all 18 eligible U.S. locations.

Planet

▶ Energy Intensity

Reduced Energy Intensity Index (EII) in all regions and achieved lowest ever U.S. EII (93.8).

▶ Climate Focus

Refined climate focus areas to guide company-wide climate actions.

Performance

▶ Growth Projects

Signed an agreement with Qatar Petroleum to jointly pursue development of petrochemical facilities in the U.S. and Qatar.

▶ Circular Economy

Significantly increased investments supporting the development of a circular economy for our products.

Circular Economy for Chemicals

We strive to meet growing customer demand for products that make life possible and we are actively working to support a circular economy for our products, focusing on plastics. Recycling plastics and chemicals back into feedstocks will reduce waste and allow for the reuse of these valuable resources.

2019 Circular Economy Highlights

Alliance to End Plastic Waste

Joined companies across the plastics value chain pledging more than \$1.5 billion to keep plastic waste out of the environment.

Circulate Capital Ocean Fund

Contributed \$15 million to 1st investment fund dedicated to eliminating plastic waste in South and Southeast Asia.

Operation Clean Sweep[®] Blue

Deepened commitment to plastic pellet management practices across U.S. and similar programs in Asia and Europe.

Plastics & You Toolkit

Produced and distributed educational materials to encourage discussions about the value of plastics and recycling.

Industry Goals

Worked toward industry goals of achieving 100% re-use, recycle or recovery of plastic packaging by 2040.

Community Enrichment

Supported our communities through litter clean-up events, volunteerism, financial contributions and more.
