

## Early Warning Detection Products

### Are your customers as safe as they could be?

Gas detectors listed by the Underwriters Laboratories (UL) can be used as an extra measure of safety for detecting gas leaks, especially under conditions where the odorant alone may not provide an adequate warning. Gas detectors emit a loud, shrill sound when gas is present and do not depend on sense of smell. Chevron Phillips Chemical encourages utility providers to promote the use of these devices to their customers.

#### Remember, safety first

Because the odor intensity can fade or people may have problems with their sense of smell, it is recommended that one or more combustible gas detectors be installed, per manufacturer's instructions, in suitable locations to ensure adequate coverage to detect gas leaks.

**Performance by design. Caring by choice.™**
