Who are we?

Chevron Phillips Chemicals International NV started its activities in Belgium in the mid-1960s under the name Phillips Petroleum Chemicals NV. It is an integral part of Chevron Phillips Chemical Company LLC, a 50/50 joint venture between Chevron Corporation and Phillips 66, headquartered in the **US**. We are one of the top global producers of olefins and polyolefins, and a leader in the distribution of aromatics, alpha olefins, styrenics, specialty chemicals, polyethylene piping and polymer resins.

In **Belgium**, Chevron Phillips Chemicals International NV coordinates marketing and sales from its EMEA headquarters in Diegem and has 2 production sites. In Tessenderlo there is the production of organosulfur related products and in Beringen we produce polyalphaolefins

You may not realize it, but you have probably used a product today made possible by the plastics and chemicals **manufactured by Chevron Phillips Chemical (CPChem)**. From medical supplies and electronics to food packaging and cosmetics, we create the building blocks for more than 70,000 consumer and industrial products.

Even as a global company with 5,000 employees, we maintain a "small business feel" and maintain a culture of **respect, diversity and inclusion**. Ask any Chevron Phillips Chemical employee what they like most about their job, and generally the answer is "the people I work with!" We attach great importance to the balance between work and private life and we like to see our employees **grow and develop**, both professionally and personally.

Chevron Phillips Chemical offers you a **varied and exciting job** in an international environment and the opportunity to learn and grow within the position. You will be part of a **dynamic team** of professional and motivated colleagues in a growing and profitable company.

We provide a fix contract with a competitive salary and an attractive package of additional benefits (insurances, various checks, bonus, training, extra holidays, occasional telework, ...)
