This product flyer is intended for reference purposes. It should not be used in place of the advice from a licensed professional engineer. 49 CFR $\S 192.121$ indicates a 0.40 Design Factor (DF) may be used on $\leq 24$ " IPS PE2708/PE4710 pipes produced after January 22, 2019 meeting the minimum wall thickness requirements per $\S$ 192.121. Unless otherwise noted, Design Pressure Ratings are calculated based on an operating temperature of $73^{\circ} \mathrm{F}$ and a Design Factor (DF) of 0.40 .49 CFR Part $\S 192.121$ also limits design pressure to 125 psig for pipe $\leq 24$ " IPS produced after January 22, 2019 meeting the minimum wall thickness requirements per $\S 192.121$.
Pipe weights are calculated in accordance with PPI TR-7. Nominal OD and Minimum wall plus $6 \%$ is used in estimating fluid flow. Actual ID will vary. When designing components to fit the pipe ID, refer to pipe dimensions and tolerances in the applicable pipe manufacturing specification.
*N/A - The wall thickness is minimum per D2513 and not a function of DR.
**Uses a Design Factor of 0.32; does not meet the minimum wall thickness requirement of 49 CFR $\S 192.121$ for Design Factor of 0.40.
Blue signifies AUTO COIL Products
