| 8" | Hard | 8.625" | 14 | 16/8/8 | 224 / 112 / 112 | 21-32.5 | 4,480' | 4,480' | 5,600' |

Bundles per truck and feet per truck are determined stacking the bundles on pipe when loading.

## Packaging Information - IPS-CTS Gas Hard Sided Bundles

## BUNDLE PACKAGING STANDARDS

1. Hard-Sided Style: (1/2" through 8.625")
A. For encasing all straight lengths that are 8.625" OD or smaller.
(1) All Hard-Side bundles to be constructed from hardwood/softwood 2" x 6 " or 3 " $\times 4$ " lumber. Grooved boards are preferable, but not mandatory as the banding will create a notch in some soft woods securing the banding in place. (Note: 2 " $\times 6$ " boards actually have a thickness of approximately $1.5^{\prime \prime}, 3^{\prime \prime} \times 4$ " have a $2.5^{\prime \prime}$ thickness)
B. Lumber Sizes and Placement:
(1) The Hard -Side bundle is encased by lumber stated in (1) above.
(a) Fifty-foot (50') straight lengths are encased at seven (7) or eight (8) equidistant locations depending on bundling cart and plant.
(b) Forty-foot ( $40^{\prime}$ ) straight lengths are encased at six (6) equidistant locations.
(c) Twenty-foot (20') straight lengths are encased at three (3) equidistant locations.
(d) Twenty-foot ( $20^{\prime}$ ) straight lengths in sizes $1 / 2^{\prime \prime}$ CTS -1 " IPS in bags are encased at (5) equidistant locations. $20^{\prime} 2 \times 6$ runners will be nailed/stapled to the bottom inside of each side of the encasings to stabilize the bundle. Four cross boards shall be placed across the bottom of the bundles between the five encasements. These boards are the width of the bundle and used to help prevent the pipe from sagging. Pipe should also be placed in plastic bags. The bags should be at least 4 mils thick x 10 "wide. (Note: they can be purchased in $750^{\prime}$ rolls and cut to size).
(e) Any loose bags of $20^{\prime}$ pipe shall be banded to the top of a full pack of another size and place on the top of the load on the truck. The size should be written on the outside of the bag.
(f) Top, side and bottom board lengths are as follows:

| IPS - Pipe Size | Top \& Bottom / <br> Second Bottom <br> Board Length | Sideboard Length | Product <br> Length |
| :---: | :---: | :---: | :---: |
| $\mathbf{1}^{1 / 4^{\prime \prime}}$ | $46 / 43$ | $10^{\prime \prime}$ | $20^{\prime}$ |
| $\mathbf{1}^{1 / 2^{\prime \prime}}$ | $443 / 4^{\prime \prime} / 413 / 4^{\prime \prime}$ | $111 / 4^{\prime \prime}$ | $20^{\prime}$ |
| $\mathbf{2}^{\prime \prime}$ | $45^{\prime \prime \prime} / 42^{3 / 4}$ | $113 / 4^{\prime \prime}$ | $20^{\prime \prime}-40^{\prime}$ |
| $\mathbf{3}^{\prime \prime}$ | $481 / 2^{\prime \prime}$ | $1212^{\prime \prime}$ | $20^{\prime}-40^{\prime}$ |
| $\mathbf{4}^{\prime \prime}$ | $48^{\prime \prime}$ | $121 / 4^{\prime \prime}$ | $20^{\prime}-40^{\prime}$ |
| $\mathbf{6}^{\prime \prime}$ | $493 / 8^{\prime \prime}$ | $18^{\prime \prime}$ | $20^{\prime}-40^{\prime}-50^{\prime}$ |
| $\mathbf{8}^{\prime \prime}$ | $461 / 8^{\prime \prime}$ | $23^{\prime \prime \prime} 2^{\prime \prime}$ | $20^{\prime}-40^{\prime}-50^{\prime}$ |

## Packaging Information - IPS-CTS Gas Hard Sided Bundles

| IPS/CTS - Pipe <br> Size in bags | Top \& Bottom / Second Bottom Board Length | Sideboard Length | Product Length |
| :---: | :---: | :---: | :---: |
| 11/2" CTS | $441 / 2^{\prime \prime} / 411 / 2^{\prime \prime}$ | $81 / 2^{\prime \prime}$ | 20' |
| $3 / 4$ " CTS | $441 / 2^{\prime \prime} / 41^{1 / 2}{ }^{\prime \prime}$ | $81 / 2{ }^{1 / \prime}$ | 20' |

| 3/4" IPS | $441 / 2^{\prime \prime} / 41^{1 / 2}{ }^{\prime \prime}$ | 20" | $20^{\prime}$ |
| 1" IPS | $441 / 2^{\prime \prime} / 41^{1 / 2}{ }^{\prime \prime}$ | $113 / 4$ " | ${ }^{20}$ |

(1) Banding: For Hard-Sided bundles, utilize $3 / 4$ " $\times 050$ polyester banding.
(a) Use one (1) band to compress each set of top, side and bottom boards.
D. Storage:
(1) Hard-Sided bundles may be aligned "wood-on-wood" or offset "wood-on-pipe" during storage except that DR 21 or thinner product must be stored "wood-on-wood". For ease of handling with forklifts, the "wood-on-wood" method is recommended in storage yards.
E. Transport:
(1) Hard-sided bundles can be offset "wood-on-pipe" or "wood-on-wood" during transport. If shipping product with "wood-on wood", the total bundles per load may need to be reduced to prevent exceeding the height restrictions. Performance Pipe's Transport Strapping Policy established minimum requirements regarding the number of truckers' straps used by all transportation providers to secure bundles. The policy also contains conditions regarding the tightening of straps after a carrier leaves a Performance Pipe facility.
