## Packaging Information - Metric Bundles

## PERFORMANCE PIPE METRIC PRODUCTS BUNDLES

$\left.\begin{array}{|c|c|c|c|c|c|c|c|c|c|}\hline \text { Size } & \begin{array}{c}\text { Bundle } \\ \text { Style }\end{array} & \begin{array}{c}\text { Pipe } \\ \text { OD }\end{array} & \begin{array}{c}\text { Joints } \\ \text { Per } \\ \text { Bundle }\end{array} & \begin{array}{c}\text { Bundles } \\ \text { Per } \\ \text { Truck }\end{array} & \begin{array}{c}\text { Truck } \\ \text { (0'-12 } \\ \text { meter }\end{array} & \text { PN } & \begin{array}{c}\text { Feet } \\ \text { per } \\ \text { Truck } \\ \text { 40' }\end{array} & \begin{array}{c}\text { Meters } \\ \text { Per } \\ \text { Truck }\end{array} \\ \hline \text { (2 meters } \\ \text { joints }\end{array}\right]$

## METRIC BUNDLE PACKAGING STANDARDS

1. Soft - Side Style:
A. For encasing all straight lengths between $3.543^{\prime \prime}$ OD and 7.874 OD.
(1) Lumber Sizes and Placement:
(a) For industrial pipe packs shall be constructed using 2"x $6^{\prime \prime}$ bottom boards (Note: 2" $\times 6^{\prime \prime}$ boards actually have a thickness of approximately $1.5^{\prime \prime}$.) For gas products plants will use 3" X 4" lumber. Hardwood or softwood is acceptable. Grooved boards are preferable, but not mandatory as the banding will create a notch in some soft woods securing the banding in place. Plants may use one (1) $3^{\prime \prime} \times 4$ " for bottom boards for any product line in diameters 3 " and 4 " to help with pack stability as long as they don't exceed height restrictions.
(b) Bottom board lengths are as follows:

| Pipe Size | Board Length |
| :---: | :---: |
| $90 \mathrm{~mm}\left(3.543^{\prime \prime}\right)$ | $42^{\prime \prime}$ |
| $110 \mathrm{~mm}\left(4.331^{\prime \prime}\right)$ | $46^{\prime \prime}$ |
| $125 \mathrm{~mm}\left(4.921^{\prime \prime}\right)$ | $48^{\prime \prime}$ |
| $160 \mathrm{~mm}\left(6.299^{\prime \prime}\right)$ | $42^{\prime \prime}$ |
| $200 \mathrm{~mm}\left(7.874^{\prime \prime}\right)$ | $44^{\prime \prime}$ |

## Packaging Information - Metric Bundles

(c) Bottom boards are spaced at six (6) equidistant locations for 12-meter joints.
(d) Bottom boards are spaced at six (6) equidistant locations for forty-foot ( $40^{\prime}$ ) joints.

## (2) Top Boards

Top boards may be used to increase the stability of 3 " and 4 " bundles.
(a) Top boards are used at manufacturer's discretion or at the customer's request.
(b) Top board are placed one each end of the bundle, in line with the end bottom board. (Optional middle top boards are acceptable.)
(c) Top boards may be constructed of $3 \times 4$ or $2 \times 6$ boards. Hardwood or softwood is acceptable.
(d) Top board lengths are as follows.

| Pipe Size | Board Length |
| :---: | :---: |
| 90 mm | $42^{\prime \prime}$ |
| 110 mm | $46^{\prime \prime}$ |

(3) Banding:

Each band on a bundle shall be tightened to the same approximate tension. Use at least one $3 / 4$ " X .050 polyester banding per bottom board.
(4) Storage:

Soft-side bundles must be stacked plumb to prevent leaning. Special care must be taken when staging bundles in storage.
(5) Transport:

Performance Pipe Transport Strapping Policy establishes minimum requirements regarding the number of trucker straps used by all transportation providers to secure bundles. The policy also contains conditions regarding the tightening of straps after a carrier leaves a Performance Pipe facility.
(6) Tarping:

All pipe series may, at customer request, be smoked tarped, $1 / 3$ tarped or full tarped depending on customer requirement.

Performance Pipe's definition of

- Smoke tarp- at least 8 ' back on top and 4 ' in front and on sides
- $1 / 3$ tarp- covering all product at minimal $1 / 3$ of the load
- Full tarp- covering all product.

An individual customer requirement may override this definition. (Customer requested tarping of any load will incur additional expense to the customer. Any damage caused by tarp is the sole responsibility of the customer requesting a tarp.)
(7) End Caps:

Place end caps (or plugs) on all series 6500, 8300, 8400 pipe, and geothermal 5300 series products or if the customer requests end caps.

## Packaging Information - Metric Bundles

## METRIC - SOFT SIDED BUNDLES (EXAMPLE)

$90 \mathrm{~mm}, 46$ ioints per bundle $\qquad$

$110 \mathrm{~mm}, 32$ ioints per bundle

$160 \mathrm{~mm}, 13$ ioints per bundle

NOTE: Loads and material not drawn to scale
