

### Marlex® 9018-01 Polyethylene

Version 1.8

Revision Date 2024-06-06

According to Regulation (EC) No. 1907/2006, Regulation (EC) No. 2020/878

SECTION 1: Identification of the substance/mixture and of the company/undertaking

### 1.1 Product identifier

### **Product information**

| Product Name | : | Marlex® 9018-01 Polyethylene                         |
|--------------|---|--|
| Material     | : | 1082096, 1082094, 1082001, 1082092, 1082093, 1082095 |

### **EC-No.Registration number**

MEDICAL APPLICATION CAUTION: Do not use this material in medical applications involving permanent implantation in the human body or permanent contact with internal body fluids or tissues fluids or tissues.

Do not use this material in medical applications involving brief or temporary implantation in the human body or contact with internal body fluids or tissues unless the material has been provided directly from Chevron Phillips Chemical Company LP or its legal affiliates under an agreement which expressly acknowledges the contemplated use.

Chevron Phillips Chemical Company LP and its legal affiliates makes no representation, promise, express warranty or implied warranty concerning the suitability of this material for use in implantation in the human body or in contact with internal body fluids or tissues.

### **SECTION 2: Hazards identification**

#### 2.1

Classification of the substance or mixture REGULATION (EC) No 1272/2008

Not a hazardous substance or mixture according to Regulation (EC) No 1272/2008.

### 2.2

### Labeling (REGULATION (EC) No 1272/2008)

Not a hazardous substance or mixture according to Regulation (EC) No 1272/2008.

### 2.3

| Other hazards<br>Results of PBT and vPvB<br>assessment | : This substance/mixture contains no components considered to<br>be either persistent, bioaccumulative and toxic (PBT), or very<br>persistent and very bioaccumulative (vPvB) at levels of 0.1%<br>or higher.   |
|--|---|
| Endocrine disrupting properties                        | <ul> <li>The substance/mixture does not contain components<br/>considered to have endocrine disrupting properties according<br/>to REACH Article 57(f) or Commission Delegated regulation<br/>(EU) 2017/2100 or Commission Regulation (EU) 2018/605 at<br/>levels of 0.1% or higher.</li> </ul> |

| SAFETY DATA SHEET        |
|--------------------------|
| Revision Date 2024-06-06 |

# Marlex® 9018-01 Polyethylene

| IVIC |  |         | yielle   |
|------|--|---------|--|
| Ver  | sion 1.8   |         | Revision Date 2024-06-06   |
|      | Specific hazards during fire fighting  | :       | Risks of ignition followed by flame propagation or secondary explosions can be caused by the accumulation of dust, e.g. on floors and ledges.  |
| 5.3  | Advice for firefighters<br>Special protective<br>equipment for fire-fighters | :       | Use personal protective equipment. Wear self-contained breathing apparatus for firefighting if necessary.  |
|      | Further information  | :       | This material will burn although it is not easily ignited.   |
|      | Fire and explosion protection  | :       | Treat as a solid that can burn. Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.  |
|      | Hazardous decomposition products   | :       | Normal combustion forms carbon dioxide, water vapor and may<br>produce carbon monoxide, other hydrocarbons and<br>hydrocarbon oxidation products (ketones, aldehydes, organic<br>acids) depending on temperature and air availability.<br>Incomplete combustion can also produce formaldehyde. |
| SEC  | CTION 6: Accidental release m  | nea     | asures   |
| 6.1  | Personal precautions, protect  | cti     | ve equipment and emergency procedures  |
| 6.2  | Personal precautions   | :       | Sweep up to prevent slipping hazard. Avoid breathing dust. Avoid dust formation.   |
| 0.2  | Environmental precautions  |         |  |
|      | Environmental precautions  | :       | Do not contaminate surface water. Prevent product from entering drains.  |
| 6.3  | <b>Methods and materials for c</b><br>Methods for cleaning up                | on<br>: | tainment and cleaning up<br>Clean up promptly by sweeping or vacuum.   |
| 6.4  | Additional advice  | :       | Dust deposits should not be allowed to accumulate on<br>surfaces, as these may form an explosive mixture if they are<br>released into the atmosphere in sufficient concentration. Avoid<br>dispersal of dust in the air (i.e., clearing dust surfaces with<br>compressed air).                 |
| 0.4  | Reference to other sections  |         |  |
|      | Reference to other sections  | :       | For personal protection see section 8. For disposal considerations see section 13.   |
| SEC  | CTION 7: Handling and storag   | е       |  |
| 7.1  | Precautions for safe handlin<br>Handling                                     | g       |  |
|      | Advice on safe handling  | :       | Use good housekeeping for safe handling of the product. Keep out of water sources and sewers. Spilled pellets may create a slipping hazard.  |
| SDS  | S Number:100000000591  |         | 5/14   |
|      |  |         |  |

| VIC | arlex® 9018-01 Polye  | th                                 | SAFETY DATA SHEET   |
|-----|---|------------------------------------|---|
| Ve  |   | un                                 | Revision Date 2024-06-06  |
|     |   |                                    | Electrostatic charge may accumulate and create a hazardous condition when handling this material. To minimize this hazard, bonding and grounding may be necessary, but may not by themselves be sufficient. At elevated temperatures (>350°F, >177°C), polyethylene can release vapors and gases, which are irritating to the mucous membranes of the eyes, mouth, throat, and lungs. These substances may include acetaldehyde, acetone, acetic acid, formic acid, formaldehyde and acrolein. Based on animal data and limited epidemiological evidence, formaldehyde has been listed as a carcinogen. Following all recommendations within this SDS should minimize exposure to thermal processing emissions. |
|     | Advice on protection against fire and explosion   | :                                  | Treat as a solid that can burn. Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.   |
| 7.2 | Conditions for safe storage   | e, in                              | cluding any incompatibilities   |
|     | Storage   |                                    |   |
|     | Requirements for storage areas and containers   | :                                  | Keep in a dry place. Keep in a well-ventilated place.   |
|     | Advice on common storage  | :                                  | Do not store together with oxidizing and self-igniting products.  |
|     | German storage class  | :                                  | Combustible Solids  |

| Information on other hazard  | S  |
|--|--|
| Marlex® 9018-01 Polyethyler<br>Further information                   | <ul> <li>This product contains POLYMERIZED OLEFINS. During thermal processing (&gt;350°F, &gt;177°C) polyolefins can release vapors and gases (aldehydes,ketones and organic acids) which are irritating to the mucous membranes of the eyes, mouth, throat, and lungs. Generally these irritant effects are all transitory. However, prolonged exposure to irritating off-gases can lead to pulmonary edema. Formaldehyde (an aldehyde) has been classified as a carcinogen based on animal data and limited epidemiological evidence.</li> </ul> |

### 13.1

### Waste treatment methods

The information in this SDS pertains only to the product as shipped.

Use material for its intended purpose or recycle if possible. This material, if it must be discarded, may meet the criteria of a hazardous waste as defined by US EPA under RCRA (40 CFR 261) or other State and local regulations. Measurement of certain physical properties and analysis for regulated components may be necessary to make a correct determination. If this material is classified as a hazardous waste, federal law requires disposal at a licensed hazardous waste disposal facility.

### **SECTION 14: Transport information**

### 14.1 - 14.7

### Transport information

The shipping descriptions shown here are for bulk shipments only, and may not apply to shipments in non-bulk packages (see regulatory definition).

Consult the appropriate domestic or international mode-specific and quantity-specific Dangerous Goods Regulations for additional shipping description requirements (e.g., technical name or names, etc.) Therefore, the information shown here, may not always agree with the bill of lading shipping description for the material. Flashpoints for the material may vary slightly between the SDS and the bill of lading.

**US DOT (UNITED STATES DEPARTMENT OF TRANSPORTATION)** NOT REGULATED AS A HAZARDOUS MATERIAL OR DANGEROUS GOODS FOR TRANSPORTATION BY THIS AGENCY.

### IMO / IMDG (INTERNATIONAL MARITIME DANGEROUS GOODS)
