

Marlex® HXB TR-512 Polyethylene

Version 1.11

Revision Date 2024-10-24

According to Regulation (EC) No. 1907/2006, Regulation (EC) No. 2020/878

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1

Product information

Product Name	: Marlex® HXB TR-512 Polyethylene
Material	: 1127946, 1025387, 1025385, 1025386, 1025427, 1025336,
	1025339, 1025389, 1025426, 1025428, 1025429, 1025425, 1025388

EC-No.Registration number

Chemical name	CAS-No. EC-No. Index No.	Legal Entity Registration number

Revision Date 2024-10-24

SECTION 3: Composition/information on ingredients

3.1 - 3.2

Substance or Mixture

Hazardous ingredients

Chemical name	CAS-No. EC-No. Index No.	Classification (REGULATION (EC) No 1272/2008)	Concentration [wt%]	Specific Conc. Limits, M-factors and ATEs	
Polyethylene Hexene Copolymer	25213-02-9		95 - 100		
Contains no hazardous ingredients according to GHS. :					

SECTION 4: First aid measures

4.1 **Description of first-aid measures** If inhaled : Move to fresh air in case of accidental inhalation of dust or fumes from overheating or combustion. If symptoms persist, call a physician. In case of skin contact : If the molten material gets on skin, quickly cool in water. Seek immediate medical attention. Do not try to peel the solidified material from the skin or use solvents or thinners to dissolve it. In case of eye contact : In the case of contact with eyes, rinse immediately with plenty of water and seek medical advice. If swallowed : Do not induce vomiting without medical advice. 4.2 Most important symptoms and effects, both acute and delayed Notes to physician Symptoms : No data available. Risks : No data available. 4.3 Indication of any immediate medical attention and special treatment needed Treatment No data available. **SECTION 5: Firefighting measures** Flash point : No data available Autoignition temperature : No data available 5.1 Extinguishing media Suitable extinguishing : Water. Water mist. Dry chemical. Carbon dioxide (CO2). Foam. If possible, water should be applied as a spray from a media fogging nozzle since this is a surface burning material. The application of high velocity water will spread the burning SDS Number:10000000791 4/14

	sion 1.11	Revision Date 2024-10-24
		surface layer. Avoid the use of straight streams that may create a dust cloud and the risk of a dust explosion. Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.
5.2	Special hazards arising from Specific hazards during fire fighting	 the substance or mixture Risks of ignition followed by flame propagation or secondary explosions can be caused by the accumulation of dust, e.g. on floors and ledges.
5.3	Advice for firefighters Special protective equipment for fire-fighters	 Use personal protective equipment. Wear self-contained breathing apparatus for firefighting if necessary.
	Further information	: This material will burn although it is not easily ignited.
	Fire and explosion protection	: Treat as a solid that can burn. Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.
	Hazardous decomposition products	Normal combustion forms carbon dioxide, water vapor and may produce carbon monoxide, other hydrocarbons and hydrocarbon oxidation products (ketones, aldehydes, organic acids) depending on temperature and air availability. Incomplete combustion can also produce formaldehyde.
SEC	CTION 6: Accidental release m	easures
6.1	Personal precautions, protect	ctive equipment and emergency procedures
	Personal precautions	: Sweep up to prevent slipping hazard. Avoid breathing dust. Avoid dust formation.
6.2	Environmental precautions	
	Environmental precautions	: Do not contaminate surface water. Prevent product from entering drains.
6.3	Methods and materials for content of the methods for cleaning up	ontainment and cleaning up : Clean up promptly by sweeping or vacuum.
	Additional advice	Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air).
6.4	Reference to other sections	
	Reference to other sections	: For personal protection see section 8. For disposal considerations see section 13.

Marlex® HXB TR-512 Polyethylene

SAFETY DATA SHEET

Version 1.11

Revision Date 2024-10-24

SECTION 7: Hand	ing and storage
-----------------	-----------------

7.1

Precautions for safe handling Handling

Advice on safe handling	:	Use good housekeeping for safe handling of the product. Keep out of water sources and sewers. Spilled pellets may create a slipping hazard. Electrostatic charge may accumulate and create a hazardous condition when handling this material. To minimize this hazard, bonding and grounding may be necessary, but may not by themselves be sufficient. At elevated temperatures (>350°F, >177°C), polyethylene can release vapors and gases, which are irritating to the mucous membranes of the eyes, mouth, throat, and lungs. These substances may include acetaldehyde, acetone, acetic acid, formic acid, formaldehyde and acrolein. Based on animal data and limited epidemiological evidence, formaldehyde has been listed as a carcinogen. Following all recommendations within this SDS should minimize exposure to thermal processing emissions.
Advice on protection against fire and explosion	:	Treat as a solid that can burn. Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.

7.2

Conditions for safe storage, including any incompatibilities

Storage

Requirements for storage areas and containers	:	Keep in a dry place. Keep in a well-ventilated place.
Advice on common storage	:	Do not store together with oxidizing and self-igniting products.
German storage class	:	Combustible Solids
Use	:	Manufacture of plastics products

SECTION 8: Exposure controls/personal protection

8.2

Exposure controls Engineering measures

Consider the potential hazards of this material (see Section 2), applicable exposure limits, job activities, and other substances in the work place when designing engineering controls and selecting personal protective equipment. If engineering controls or work practices are not adequate to prevent exposure to harmful levels of this material, the personal protective equipment listed below is recommended. The user should read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances.

Personal protective equipment

SDS Number:10000000791

Marlex[®] HXB TR-512 Polyethylene

SAFETY DATA SHEET

Version 1.11

SDS Number:100000000791

Revision Date 2024-10-24

<u>· · · · · · · · · · · · · · · · · · · </u>	
Respiratory protection	 No respiratory protection is normally required. If heated material generates vapor or fumes that are not adequately controlled by ventilation, wear an appropriate respirator. Use the following elements for air-purifying respirators: Organic Vapor and Formaldehyde. A positive pressure, air-supplying respirator may be appropriate if there is potential for uncontrolled release, aerosolization, exposure levels are not known, or other circumstances where air-purifying respirators may not provide adequate protection. Dust safety masks are recommended when the dust concentration is excessive.
Eye protection	: Use of safety glasses with side shields for solid handling is good industrial practice. If this material is heated, wear chemical goggles or safety glasses with side shields or a face shield. If there is potential for dust, use chemical goggles.
Skin and body protection	: At ambient temperatures use of clean and protective clothing is good industrial practice. If the material is heated or molten, wear thermally insulated, heat-resistant gloves that are able to withstand the temperature of the molten product. If this material is heated, wear insulated clothing to prevent skin contact if engineering controls or work practices are not adequate.
SECTION 9: Physical and chem	nical properties

Marlex® HXB TR-512 Po	SAFETY DATA SHEET		
	Revision Date 2024-10-24		
Thermal decomposition	 Kevision Date 2024-10-24 Low molecular weight hydrocarbons, alcohols, aldehydes, acids and ketones can be formed during thermal processing. 		
10.6 Hazardous decomposition products	: Normal combustion forms carbon dioxide, water vapor and may produce carbon monoxide, other hydrocarbons and hydrocarbon oxidation products (ketones, aldehydes, organic acids) depending on temperature and air availability. Incomplete combustion can also produce formaldehyde.		
Other data	: No decomposition if stored and applied as directed.		
SECTION 11: Toxicological inform	nation		
11.1			
Information on toxicological	effects		
Marlex® HXB TR-512 PolyetI Acute oral toxicity	n ylene : Presumed Not Toxic		
Marlex® HXB TR-512 Polyeth Acute inhalation toxicity			
Marlex® HXB TR-512 Polyeth Acute dermal toxicity	n ylene : Presumed Not Toxic		
Marlex® HXB TR-512 Polyeth Skin irritation	nylene : No skin irritation		
Marlex® HXB TR-512 Polyeth Eye irritation	n ylene : No eye irritation		
Marlex® HXB TR-512 PolyetI Sensitization	ylene : Did not cause sensitization on laboratory animals.		
Marlex® HXB TR-512 Polyeth Aspiration toxicity Toxicology Assessment			
Marlex® HXB TR-512 Polyeth CMR effects	 carcinogenicity: No adverse effects expected Mutagenicity: No adverse effects expected Reproductive toxicity: No adverse effects expected

2.6 Endocrine disrupting pro	perties		
Endocrine disrupting properties	 The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher. 		

Marlex® HXB TR-512 Polyethylene

SAFETY DATA SHEET

Version 1.11

Revision Date 2024-10-24

12.7

Other adverse effects

Additional ecological	This material is not expected to be harmful to aquatic organisms., Fish or birds may eat pellets which may obstruct
	their digestive tracts.

12.8

Additional Information

Ecotoxicology Assessment

Short-term (acute) aquatic hazard	: This product has no known ecotoxicological effects.
Long-term (chronic) aquatic hazard	: This product has no known ecotoxicological effects.

SECTION 13: Disposal considerations

13.1

Waste treatment methods

The information in this SDS pertains only to the product as shipped.

Use material for its intended purpose or recycle if possible. This material, if it must be discarded, may meet the criteria of a hazardous waste as defined by US EPA under RCRA (40 CFR 261) or other State and local regulations. Measurement of certain physical properties and analysis for regulated components may be necessary to make a correct determination. If this material is classified as a hazardous waste, federal law requires disposal at a licensed hazardous waste disposal facility.

SECTION 14: Transport information

14.1 - 14.7

Transport information

The shipping descriptions shown here are for bulk shipments only, and may not apply to shipments in non-bulk packages (see regulatory definition).

Consult the appropriate domestic or international mode-specific and quantity-specific Dangerous Goods Regulations for additional shipping description requirements (e.g., technical name or names, etc.) Therefore, the information shown here, may not always agree with the bill of lading shipping description for the material. Flashpoints for the material may vary slightly between the SDS and the bill of lading.
