### SAFETY DATA SHEET

## Marlex® H528 Polyethylene

Version 1.10

Revision Date 2024-10-23

According to Regulation (EC) No. 1907/2006, Regulation (EC) No. 2020/878

:

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1

### **Product information**

Product Name Material

Marlex® H528 Polyethylene : 1089925, 1089927, 1089928, 1089926, 1089923, 1089929, 1089924

### **EC-No.Registration number**

SAFETY DATA SHEET

Version 1.10

Revision Date 2024-10-23

| <b>SECTION 7</b> | : Handling | and storage |
|------------------|------------|-------------|
|------------------|------------|-------------|

### 7.1 Precautions for safe handling Handling Advice on safe handling Use good housekeeping for safe handling of the product. Keep out of water sources and sewers. Spilled pellets may create a slipping hazard. Electrostatic charge may accumulate and create a hazardous condition when handling this material. To minimize this hazard, bonding and grounding may be necessary, but may not by themselves be sufficient. At elevated temperatures (>350°F, >177°C), polyethylene can release vapors and gases, which are irritating to the mucous membranes of the eyes, mouth, throat, and lungs. These substances may include acetaldehyde, acetone, acetic acid, formic acid, formaldehyde and acrolein. Based on animal data and limited epidemiological evidence, formaldehyde has been listed as a carcinogen. Following all recommendations within this SDS should minimize exposure to thermal processing emissions. Advice on protection Treat as a solid that can burn. Avoid generating dust: fine dust against fire and explosion dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard. 7.2 Conditions for safe storage, including any incompatibilities Storage Requirements for storage : Keep in a dry place. Keep in a well-ventilated place. areas and containers : Do not store together with oxidizing and self-igniting products. Advice on common storage **Combustible Solids** German storage class Use Manufacture of plastics products : **SECTION 8: Exposure controls/personal protection**

#### 8.2

#### Exposure controls Engineering measures

Consider the potential hazards of this material (see Section 2), applicable exposure limits, job activities, and other substances in the work place when designing engineering controls and selecting personal protective equipment. If engineering controls or work practices are not adequate to prevent exposure to harmful levels of this material, the personal protective equipment listed below is recommended. The user should read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances.

#### Personal protective equipment

SDS Number:10000000696

SAFETY DATA SHEET

Version 1.10

Revision Date 2024-10-23

| ve  |   |       | Revision Date 2024-10-23   |
|-----|---|-------|--|
|     | Respiratory protection                                    | :     | No respiratory protection is normally required. If heated<br>material generates vapor or fumes that are not adequately<br>controlled by ventilation, wear an appropriate respirator. Use<br>the following elements for air-purifying respirators: Organic<br>Vapor and Formaldehyde. A positive pressure, air-supplying<br>respirator may be appropriate if there is potential for<br>uncontrolled release, aerosolization, exposure levels are not<br>known, or other circumstances where air-purifying respirators<br>may not provide adequate protection.<br>Dust safety masks are recommended when the dust<br>concentration is excessive. |
|     | Eye protection  | :     | Use of safety glasses with side shields for solid handling is<br>good industrial practice. If this material is heated, wear<br>chemical goggles or safety glasses with side shields or a face<br>shield. If there is potential for dust, use chemical goggles.   |
|     | Skin and body protection                                  | :     | At ambient temperatures use of clean and protective clothing is<br>good industrial practice. If the material is heated or molten,<br>wear thermally insulated, heat-resistant gloves that are able to<br>withstand the temperature of the molten product. If this<br>material is heated, wear insulated clothing to prevent skin<br>contact if engineering controls or work practices are not<br>adequate.   |

| Version 1.10  | Revision Date 2024-10-2  |
| Marlex® H528 Polyethylene<br>Further information                    | : This product contains POLYMERIZED OLEFINS. During<br>thermal processing (>350°F, >177°C) polyolefins can release<br>vapors and gases (aldehydes,ketones and organic acids)<br>which are irritating to the mucous membranes of the eyes,<br>mouth, throat, and lungs. Generally these irritant effects are all<br>transitory. However, prolonged exposure to irritating off-gases<br>can lead to pulmonary edema. Formaldehyde (an aldehyde)<br>has been classified as a carcinogen based on animal data and<br>limited epidemiological evidence. |

SAFETY DATA SHEET

Version 1.10

Revision Date 2024-10-23

### 12.7

### Other adverse effects

| 3           | This material is not expected to be harmful to aquatic                               |
|-------------|--|
| information | organisms., Fish or birds may eat pellets which may obstruct their digestive tracts. |

### 12.8

Additional Information

### Ecotoxicology Assessment

| Short-term (acute) aquatic<br>hazard  | : This material is not expected to be harmful to aquatic organisms. |  |
|---------------------------------------|---|--|
| Long-term (chronic) aquatic<br>hazard | : This material is not expected to be harmful to aquatic organisms. |  |

### **SECTION 13: Disposal considerations**

### 13.1

### Waste treatment methods

The information in this SDS pertains only to the product as shipped.

Use material for its intended purpose or recycle if possible. This material, if it must be discarded, may meet the criteria of a hazardous waste as defined by US EPA under RCRA (40 CFR 261) or other State and local regulations. Measurement of certain physical properties and analysis for regulated components may be necessary to make a correct determination. If this material is classified as a hazardous waste, federal law requires disposal at a licensed hazardous waste disposal facility.

### **SECTION 14: Transport information**

#### 14.1 - 14.7

### Transport information

The shipping descriptions shown here are for bulk shipments only, and may not apply to shipments in non-bulk packages (see regulatory definition).

Consult the appropriate domestic or international mode-specific and quantity-specific Dangerous Goods Regulations for additional shipping description requirements (e.g., technical name or names, etc.) Therefore, the information shown here, may not always agree with the bill of lading shipping description for the material. Flashpoints for the material may vary slightly between the SDS and the bill of lading.

### US DOT (UNITED STATES DEPARTMENT OF TRANSPORTATION)

NOT REGULATED AS A HAZARDOUS MATERIAL OR DANGEROUS GOODS FOR TRANSPORTATION BY THIS AGENCY.

### IMO / IMDG (INTERNATIONAL MARITIME DANGEROUS GOODS)

NOT REGULATED AS A HAZARDOUS MATERIAL OR DANGEROUS GOODS FOR TRANSPORTATION BY THIS AGENCY.

### SAFETY DATA SHEET

# Version 1.10

Revision Date 2024-10-23

|       | Values  |       |  |
|-------|---|-------|--|
| GHS   | Globally Harmonized System                                  | RCRA  | Resource Conservation Recovery<br>Act  |
| >=    | Greater Than or Equal To                                    | STEL  | Short-term Exposure Limit  |
| IC50  | Inhibition Concentration 50%                                | SARA  | Superfund Amendments and<br>Reauthorization Act.   |
| IARC  | International Agency for Research<br>on Cancer              | TLV   | Threshold Limit Value  |
| IECSC | Inventory of Existing Chemical<br>Substances in China       | TWA   | Time Weighted Average  |
| ENCS  | Japan, Inventory of Existing and<br>New Chemical Substances | TSCA  | Toxic Substance Control Act  |
| KECI  | Korea, Existing Chemical<br>Inventory                       | UVCB  | Unknown or Variable Composition,<br>Complex Reaction Products, and<br>Biological Materials |
| <=    | Less Than or Equal To                                       | WHMIS | Workplace Hazardous Materials<br>Information System  |
| LC50  | Lethal Concentration 50%                                    | ATE   | Acute toxicity estimate  |
