Do not use this material in medical applications involving brief or temporary implantation in the human body or contact with internal body fluids or tissues unless the material has been provided directly from Chevron Phillips Chemical Company LP or its legal affiliates under an agreement which expressly acknowledges the contemplated use. Chevron Phillips Chemical Company LP and its legal affiliates makes no representation, promise, express warranty or implied warranty concerning the suitability of this material for use in implantation in the human body or in contact with internal body fluids or tissues. **SECTION 2: Hazards identification** Classification of the substance or mixture GHS Classification and Labeling: Follow GB 13690, GB 15258 and GB 30000.2 to GB 30000.29 (GHS 2013) **Emergency Overview** Form: Pellets Physical state: solid Color: Opaque Odor: Mild to no odor Classification Not a hazardous substance or mixture. SDS Number:10000000655 2/11

Marlex® D139 Polyethylene

Version 1.15

Revision Date 2025-07-02

Labeling

Not a hazardous substance or mixture.

Chemical name			CAS-No. / EINECS-No.	Concentration [wt%]	
Polyethylene Hexene Copol	yme	er	25213-02-9	99 - 100	
Contains no hazardous ingre	die	nts accordir	ng to GHS.		
TION 4: First aid measures					
If inhaled	:	fumes fror	Move to fresh air in case of accidental inhalation of dust or fumes from overheating or combustion. If symptoms persist, call a physician.		
In case of skin contact	:	immediate	If the molten material gets on skin, quickly cool in water. Seek immediate medical attention. Do not try to peel the solidified material from the skin or use solvents or thinners to dissolve it.		
In case of eye contact	:		e of contact with eyes, rinse ir nd seek medical advice.	mmediately with plenty	
If swallowed	:	Do not inc	luce vomiting without medical	advice.	
TION 5: Firefighting measu	res				
Flash point	:	No data a	vailable		
Autoignition temperature	:	No data av	vailable		
Suitable extinguishing media	:	Water. Water mist. Dry chemical. Carbon dioxide (CO2). Foam. If possible, water should be applied as a spray from a fogging nozzle since this is a surface burning material. The application of high velocity water will spread the burning surface layer. Avoid the use of straight streams that may create a dust cloud and the risk of a dust explosion. Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.			
Specific hazards during fire fighting	:		nition followed by flame prop s can be caused by the accun ledges.		
Special protective equipment for fire-fighters	:		nal protective equipment. We apparatus for firefighting if ne		
Further information	:	This mate	rial will burn although it is not	easily ignited.	
Fire and explosion	:	Treat as a	solid that can burn. Avoid ge	enerating dust; fine dus	

rlex® D139 Polyeth	SAFETY DATA SHI
sion 1.15	Revision Date 2025-07
protection	dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.
Hazardous decomposition products	: Normal combustion forms carbon dioxide, water vapor and may produce carbon monoxide, other hydrocarbons and hydrocarbon oxidation products (ketones, aldehydes, organic acids) depending on temperature and air availability. Incomplete combustion can also produce formaldehyde.
CTION 6: Accidental release	measures
Personal precautions	: Sweep up to prevent slipping hazard. Avoid breathing dust. Avoid dust formation.
Environmental precautions	: Do not contaminate surface water. Prevent product from entering drains.
Methods for cleaning up	: Clean up promptly by sweeping or vacuum.
Additional advice	: Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air).
TION 7: Handling and stora	ge
Handling	
Advice on safe handling	: Use good housekeeping for safe handling of the product. Keep out of water sources and sewers. Spilled pellets may create a slipping hazard. Electrostatic charge may accumulate and create a hazardous condition when handling this material. To minimize this hazard, bonding and grounding may be necessary, but may not by themselves be sufficient. At elevated temperatures (>350°F, >177°C), polyethylene can release vapors and gases, which are irritating to the mucous membranes of the eyes, mouth, throat, and lungs. These substances may include acetaldehyde, acetone, acetic acid, formic acid, formaldehyde and acrolein. Based on animal data and limited epidemiological evidence, formaldehyde has been listed as a carcinogen. Following all recommendations within this SDS should minimize exposure to thermal processing emissions.
Advice on protection against fire and explosion	: Treat as a solid that can burn. Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.
Storage	
	: Keep in a dry place. Keep in a well-ventilated place.
Requirements for storage areas and containers	

Marlex® D139 Polyethylene

Version 1.15

Revision Date 2025-07-02

Advice on common storage : Do not store together with oxidizing and self-igniting products.

SECTION 8: Exposure controls/personal protection

Not applicable

Engineering measures

Consider the potential hazards of this material (see Section 2), applicable exposure limits, job activities, and other substances in the work place when designing engineering controls and selecting personal protective equipment. If engineering controls or work practices are not adequate to prevent exposure to harmful levels of this material, the personal protective equipment listed below is recommended. The user should read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances.

Personal protective equipment

Respiratory protection	:	No respiratory protection is normally required. If heated material generates vapor or fumes that are not adequately controlled by ventilation, wear an appropriate respirator. Use the following elements for air-purifying respirators: Organic Vapor and Formaldehyde. A positive pressure, air-supplying respirator may be appropriate if there is potential for uncontrolled release, aerosolization, exposure levels are not known, or other circumstances where air-purifying respirators may not provide adequate protection. Dust safety masks are recommended when the dust concentration is excessive.
Eye protection	:	Use of safety glasses with side shields for solid handling is good industrial practice. If this material is heated, wear chemical goggles or safety glasses with side shields or a face shield. If there is potential for dust, use chemical goggles.
Skin and body protection	:	At ambient temperatures use of clean and protective clothing is good industrial practice. If the material is heated or molten, wear thermally insulated, heat-resistant gloves that are able to withstand the temperature of the molten product. If this material is heated, wear insulated clothing to prevent skin contact if engineering controls or work practices are not adequate.

SECTION 9: Physical and chemical properties

-	physical and chemical properties
Appearance	
Form	: Pellets
Physical state	: solid
Color	: Opaque
Odor	: Mild to no odor
Odor Threshold	: No data available

Marlex® D139 Polyethylene

Version 1.15		Revision Date 2025-07-02
Lower explosion limit	: Not applicable	
Upper explosion limit	: Not applicable	
Autoignition temperature	: No data available	
Thermal decomposition	: Low molecular weight hydrocarbons, a acids and ketones can be formed durin	
рН	: Not applicable	
Melting point/ range	: 90-140°C (194-284°F)	
Freezing point	Not applicable	
Initial boiling point and boiling range	: Not applicable	
Vapor pressure	: Not applicable	
Relative density	: Not applicable	
Density	: 0.91 - 0.97 g/cm3 Please refer to the Technical Data Shee detailed information relating to the nomi properties, including density, of this poly	nal physical
Water solubility	: negligible	
Partition coefficient: n- octanol/water	: No data available	
Solubility in other solvents	: No data available	
Viscosity, dynamic	: Not applicable	
Viscosity, kinematic	: Not applicable	
Relative vapor density	: Not applicable	
Evaporation rate	: Not applicable	
Dust deflagration index Kst	: > 0.0 m.b_/s	
SECTION 10: Stability and reactiv	ity	
Reactivity	: This material is considered non-reactive ambient and anticipated storage and ha temperature and pressure.	
SDS Number:10000000655	6/11	

lex® D139 Polyethyl on 1.15		
011 1.10		Revision Date 2025-0
Chemical stability	:	This material is considered stable under normal ambient and anticipated storage and handling conditions of temperature and pressure.
ossibility of hazardous read	ctic	ons
lazardous reactions	:	Hazardous reactions: None known.
Conditions to avoid	:	Avoid prolonged storage at elevated temperature.
laterials to avoid	:	Avoid contact with strong oxidizing agents.
hermal decomposition	:	Low molecular weight hydrocarbons, alcohols, aldehydes, acids and ketones can be formed during thermal processing.
lazardous decomposition roducts	:	Normal combustion forms carbon dioxide, water vapor and may produce carbon monoxide, other hydrocarbons and hydrocarbon oxidation products (ketones, aldehydes, organic acids) depending on temperature and air availability. Incomplete combustion can also produce formaldehyde.
Other data	:	No decomposition if stored and applied as directed.

	Key or legend to abbreviations and a	cronyms used	
ACGIH	American Conference of	LD50	Lethal Dose 50%
AIIC	Government Industrial Hygienists Australian Inventory of Industrial Chemicals	LOAEL	Lowest Observed Adverse Effect
DSL	Canada, Domestic Substances List	NFPA	National Fire Protection Agency
NDSL	Canada, Non-Domestic Substances List	NIOSH	National Institute for Occupationa Safety & Health
CNS	Central Nervous System	NTP	National Toxicology Program
CAS	Chemical Abstract Service	NZIoC	New Zealand Inventory of Chemicals
EC50	Effective Concentration	NOAEL	No Observable Adverse Effect Level
EC50	Effective Concentration 50%	NOEC	No Observed Effect Concentration
EGEST	EOSCA Generic Exposure Scenario Tool	OSHA	Occupational Safety & Health Administration
EOSCA	European Oilfield Specialty Chemicals Association	PEL	Permissible Exposure Limit
EINECS	European Inventory of Existing Chemical Substances	PICCS	Philippines Inventory of Commercial Chemical Substance
MAK	Germany Maximum Concentration Values	PRNT	Presumed Not Toxic
GHS	Globally Harmonized System	RCRA	Resource Conservation Recovery Act
>=	Greater Than or Equal To	STEL	Short-term Exposure Limit
IC50	Inhibition Concentration 50%	SARA	Superfund Amendments and Reauthorization Act.
IARC	International Agency for Research on Cancer	TLV	Threshold Limit Value
IECSC	Inventory of Existing Chemical Substances in China	TWA	Time Weighted Average
	Japan, Inventory of Existing and	TSCA	Toxic Substance Control Act
ENCS	New Chemical Substances	-	Linknown or Variable Composition
	New Chemical Substances Korea, Existing Chemical Inventory	UVCB	Unknown or Variable Composition Complex Reaction Products, and Biological Materials
