Do not use this material in medical applications involving brief or temporary implantation in the human body or contact with internal body fluids or tissues unless the material has been provided directly from Chevron Phillips Chemical Company LP or its legal affiliates under an agreement which expressly acknowledges the contemplated use. Chevron Phillips Chemical Company LP and its legal affiliates makes no representation, promise, express warranty or implied warranty concerning the suitability of this material for use in implantation in the human body or in contact with internal body fluids or tissues. **SECTION 2: Hazards identification** Classification of the substance or mixture GHS Classification and Labeling: Follow GB 13690, GB 15258 and GB 30000.2 to GB 30000.29 (GHS 2013) **Emergency Overview** Form: Pellets Physical state: solid Color: Opaque Odor: Mild to no odor Classification Not a hazardous substance or mixture. SDS Number:10000000659 2/11

# Marlex® D143 Polyethylene

Version 1.16

Revision Date 2025-07-02

## Labeling

Not a hazardous substance or mixture.

| Chemical name                                     |     |  | CAS-No. / EINECS-No.   | Concentration<br>[wt%]   |  |
|---|-----|--|--|--------------------------|--|
| Polyethylene Hexene Copol                         | yme | er   | 25213-02-9   | 99 - 100                 |  |
| Contains no hazardous ingre                       |     | nts accordir   | ng to GHS.   |                          |  |
| TION 4: First aid measures                        |     |  |  |                          |  |
| lf inhaled  | :   | fumes fror   | Move to fresh air in case of accidental inhalation of dust or fumes from overheating or combustion. If symptoms persist, call a physician.   |                          |  |
| In case of skin contact                           | :   | immediate  | If the molten material gets on skin, quickly cool in water. Seek<br>immediate medical attention. Do not try to peel the solidified<br>material from the skin or use solvents or thinners to dissolve it. |                          |  |
| In case of eye contact                            | :   |  | In the case of contact with eyes, rinse immediately with plenty of water and seek medical advice.  |                          |  |
| If swallowed                                      | :   | Do not induce vomiting without medical advice.   |  |                          |  |
| TION 5: Firefighting measu                        | res |  |  |                          |  |
| Flash point                                       | :   | No data a  | vailable   |                          |  |
| Autoignition temperature                          | :   | No data av   | vailable   |                          |  |
| Suitable extinguishing<br>media                   | :   | Water. Water mist. Dry chemical. Carbon dioxide (CO2).<br>Foam. If possible, water should be applied as a spray from a<br>fogging nozzle since this is a surface burning material. The<br>application of high velocity water will spread the burning<br>surface layer. Avoid the use of straight streams that may<br>create a dust cloud and the risk of a dust explosion. Use<br>extinguishing measures that are appropriate to local<br>circumstances and the surrounding environment. |  |                          |  |
| Specific hazards during fire<br>fighting          | :   | Risks of ignition followed by flame propagation or secondary explosions can be caused by the accumulation of dust, e.g. on floors and ledges.  |  |                          |  |
| Special protective<br>equipment for fire-fighters | :   |  | nal protective equipment. We apparatus for firefighting if nea   |                          |  |
| Further information                               | :   | This mate  | rial will burn although it is not  | easily ignited.          |  |
| Fire and explosion                                | :   | Treat as a   | solid that can burn. Avoid ge  | enerating dust; fine dus |  |

| rlex® D143 Polyethy                                |     | SAFETY DATA SHE   |
|--|-----|---|
| sion 1.16  | yie | Revision Date 2025-07   |
| protection   |     | dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.  |
| Hazardous decomposition products                   | :   | Normal combustion forms carbon dioxide, water vapor and may<br>produce carbon monoxide, other hydrocarbons and<br>hydrocarbon oxidation products (ketones, aldehydes, organic<br>acids) depending on temperature and air availability.<br>Incomplete combustion can also produce formaldehyde.  |
| TION 6: Accidental release                         | me  | asures  |
| Personal precautions                               | :   | Sweep up to prevent slipping hazard. Avoid breathing dust. Avoid dust formation.  |
| Environmental precautions                          | :   | Do not contaminate surface water. Prevent product from entering drains.   |
| Methods for cleaning up                            | :   | Clean up promptly by sweeping or vacuum.  |
| Additional advice                                  | :   | Dust deposits should not be allowed to accumulate on<br>surfaces, as these may form an explosive mixture if they are<br>released into the atmosphere in sufficient concentration. Avoid<br>dispersal of dust in the air (i.e., clearing dust surfaces with<br>compressed air).  |
| TION 7: Handling and stora                         | ge  |   |
| Advice on safe handling                            | :   | Use good housekeeping for safe handling of the product. Keep<br>out of water sources and sewers. Spilled pellets may create a<br>slipping hazard.<br>Electrostatic charge may accumulate and create a hazardous<br>condition when handling this material. To minimize this hazard,<br>bonding and grounding may be necessary, but may not by<br>themselves be sufficient. At elevated temperatures (>350°F,<br>>177°C), polyethylene can release vapors and gases, which<br>are irritating to the mucous membranes of the eyes, mouth,<br>throat, and lungs. These substances may include |
|  |     | acetaldehyde, acetone, acetic acid, formic acid, formaldehyde<br>and acrolein. Based on animal data and limited<br>epidemiological evidence, formaldehyde has been listed as a<br>carcinogen. Following all recommendations within this SDS<br>should minimize exposure to thermal processing emissions.  |
| Advice on protection<br>against fire and explosion | :   | and acrolein. Based on animal data and limited<br>epidemiological evidence, formaldehyde has been listed as a<br>carcinogen. Following all recommendations within this SDS  |
|  | :   | and acrolein. Based on animal data and limited<br>epidemiological evidence, formaldehyde has been listed as a<br>carcinogen. Following all recommendations within this SDS<br>should minimize exposure to thermal processing emissions.<br>Treat as a solid that can burn. Avoid generating dust; fine dust<br>dispersed in air in sufficient concentrations, and in the<br>presence of an ignition source is a potential dust explosion  |

#### SAFETY DATA SHEET

#### Version 1.16

Revision Date 2025-07-02

Advice on common storage : Do not store together with oxidizing and self-igniting products.

#### **SECTION 8: Exposure controls/personal protection**

Not applicable

#### **Engineering measures**

Consider the potential hazards of this material (see Section 2), applicable exposure limits, job activities, and other substances in the work place when designing engineering controls and selecting personal protective equipment. If engineering controls or work practices are not adequate to prevent exposure to harmful levels of this material, the personal protective equipment listed below is recommended. The user should read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances.

#### Personal protective equipment

| Respiratory protection   | : | No respiratory protection is normally required. If heated<br>material generates vapor or fumes that are not adequately<br>controlled by ventilation, wear an appropriate respirator. Use<br>the following elements for air-purifying respirators: Organic<br>Vapor and Formaldehyde. A positive pressure, air-supplying<br>respirator may be appropriate if there is potential for<br>uncontrolled release, aerosolization, exposure levels are not<br>known, or other circumstances where air-purifying respirators<br>may not provide adequate protection.<br>Dust safety masks are recommended when the dust<br>concentration is excessive. |
|--------------------------|---|--|
| Eye protection           | : | Use of safety glasses with side shields for solid handling is<br>good industrial practice. If this material is heated, wear<br>chemical goggles or safety glasses with side shields or a face<br>shield. If there is potential for dust, use chemical goggles.   |
| Skin and body protection | : | At ambient temperatures use of clean and protective clothing is<br>good industrial practice. If the material is heated or molten,<br>wear thermally insulated, heat-resistant gloves that are able to<br>withstand the temperature of the molten product. If this<br>material is heated, wear insulated clothing to prevent skin<br>contact if engineering controls or work practices are not<br>adequate.   |

#### **SECTION 9: Physical and chemical properties**

| Appearance  |  |
