

## Product Regulatory Overview (PRO) Food Contact/ Drug Packaging Marlex® HXM 50100P Polyethylene

### **Company**

Chevron Phillips Chemical (CPChem)<sup>1</sup>

### **Food Contact**

*It is the responsibility of the packaging converter or food packager to verify that the finished article meets both the technical and regulatory requirements of the intended application.*

#### **U.S. FDA Food Contact**

This product meets the requirements for polyolefin resins intended for food packaging applications as described in the FDA regulations 21 CFR 177.1520 including 21 CFR 177.1520(c) 3.1a, 3.2a and 21 CFR 177.1520(b). The resin may be used in contact with all types of foods as defined in Table 1, 21 CFR 176.170(c) and at use conditions B-H as defined in Table 2, 21 CFR 176.170(c).

This product is produced in accordance with good manufacturing practices (GMP) as outlined in 21 CFR 174.5.

#### **European Union (EU) Food Contact**

As plastic intermediate material, the monomer(s) and the additive(s) of this resin are listed in Annex I Table 1, Commission Regulation (EU) No 10/2011 on plastic materials and articles intended to come into contact with food and all its Amendments including Commission Regulation (EU) 2023/1442 and 2023/1627. The monomer(s) and the additive(s) do not have restriction(s) and specification(s) in Column 10 of Table 1, Annex I of Commission Regulation (EU) No 10/2011.

Bisphenol A (BPA), other bisphenols and bisphenol derivatives are not intentionally used as additives or raw materials in the manufacture of this product. This product complies with Commission Regulation (EU) 2024/3190.

See following link for latest amendment review:

<https://www.cpchem.com/who-we-are/environment-health-safety-security/regulatory-information>  
(SELECT EU Food Contact Amendment)

This product was tested for the overall migration compliance and specific migration compliance per Commission Regulation (EU) No 10/2011. The tested sample thickness was 3.175 mm (125 mils). The surface-to-volume ratio was 1 dm<sup>2</sup> sample to 1dl simulant.

For measuring the overall migration levels, this product was tested with 3% acetic acid for 10 days at 40°C, with 50% ethanol for 10 days at 40°C, and with olive oil for 10 days at 40°C. For measuring specific migration levels, this product was tested with 3% acetic acid for 10 days at 60°C, with 50% ethanol for 10 days at 60°C, and with olive oil for 10 days at 60°C. This product complies with the overall migration limit (OML) and specific migration limits (SML).

This product meets the restriction(s) on the substances in Table 1, Annex II of Commission Regulation (EU) No 10/2011 amended by Commission Regulation (EU) 2020/1245. Primary aromatic amines are not intentionally used as additives or raw materials in the manufacture of this product.

<sup>1</sup>Note: Marlex® HXM 50100P Polyethylene as sold by CPChem but produced by Saudi Polymers Company (SPCo).

**Product Regulatory Overview (PRO)**  
**Food Contact/ Drug Packaging**  
**Marlex® HXM 50100P Polyethylene**

This product does not contain intentionally added genotoxic substance that would be expected to migrate from resin exceeding 0.00015 mg/kg in food or food simulant to cause genotoxic effect.

This product does not contain food additive(s) or flavoring(s) that would be a concern in food per Regulation (EC) No 1333/2008 or Regulation (EC) No 1334/2008.

This product meets the requirements of Framework Regulation (EC) No 1935/2004 on materials and articles intended to come into contact with food.

This product is produced in accordance with good manufacturing practice (GMP) as outlined in EU GMP Regulation (EC) No 2023/2006.

**Germany BfR Recommendations**

This product meets the requirements on catalyst residues and residual decomposition products in German BfR Recommendations on Food Contact Materials III Polyethylene.

**China Food Contact**

This polyethylene resin is an ethylene and hexene copolymer, and is listed on GB 4806.7-2023 "Standard on food-contact use plastic materials and articles" Appendix A Table A.1, as No 152, CAS 25213-02-9. The monomer 1-hexene has SML 3 mg/kg.

The additive(s) of this resin are all listed on GB 9685-2016 "Standard on the uses of additives in food contact materials and articles", and meet the corresponding allowed maximum use levels.

This polyethylene resin meets the sensory requirements (as resin and in food simulants).

This polyethylene resin was tested per GB 4806.7-2023, and meets the corresponding requirements.

- This resin was tested overall migration levels for overall migration limit (OML) compliance. The tested sample thickness was 3.175 mm (125 mils). The surface-to-volume ratio was 6 dm<sup>2</sup> sample immersed in 1L simulant. This product was tested with 4% acetic acid for 10 days at 40°C, with 10 % ethanol for 10 days at 40°C, with 50 % ethanol for 10 days at 40°C, and with olive oil for 10 days at 40°C.
- This resin was tested for the KMnO<sub>4</sub> consumption in water (60°C, 2h).
- This resin was tested for heavy metal as Pb in 4 % acetic acid (60°C, 2h).

Primary aromatic amines and colorant are not intentionally used as additives or raw materials in the manufacture of this product.

This product was tested and calculated for specific migration compliance. The tested sample thickness was 3.175 mm (125 mils). The surface-to-volume ratio was 6 dm<sup>2</sup> sample immersed in 1L simulant.

For measuring the specific migration levels, this product was tested with 4 % acetic acid for 10 days at 60°C, with 10 % ethanol for 10 days at 60°C, with 50 % ethanol for 10 days at 60°C, with 95 % ethanol for 10 days at 60°C and with isooctane for 10 days at 20°C. This product met the specific migration limit(s) (SML).

## **Product Regulatory Overview (PRO) Food Contact/ Drug Packaging Marlex® HXM 50100P Polyethylene**

This resin meets the requirements of GB 4806.1-2016 General safety requirements for food contact materials and articles.

This resin is produced in accordance with good manufacturing practice (GMP) as outlined in GB 31603-2015 General hygiene standard on manufacturing food contact materials and articles.

### **Japan Food Contact**

Japanese Ministry of Health, Labor and Welfare (MHLW) published a revised version of Positive List (PL) System for food-contact materials (FCM) used in the manufacture of food-contact utensils, containers, and packaging (UCP) in late 2023. The requirements took effect on June 1, 2025.

- This product is polyethylene 1-hexene/ethylene copolymer (CAS Number 25213-02-9). It is listed on APPENDED TABLE 1, Table 1 Base Materials as “polymer composed of alkenes as the main monomer” Polymer Group 2.
- Additive(s) in this product are all listed on APPENDED TABLE 1, Table 2 Additives or are exempted. Additive(s) in this product meet the maximum use level limit(s). There are no restrictions on food types or temperature.

### **Mercosur Food Contact**

The monomer(s) of this resin are listed in Mercosur /GMC/Res. N° 02/12 and its modification GMC/Res. N° 19/21.

The additive(s) in this product are listed in Mercosur/GMC/Res. N° 39/19.

GMC Res. No. 20/21, “Modification of GMC Resolution No. 56/92 General Provisions for plastic containers and equipment in contact with food,” is applicable to a final article.

### **Brazil Food Contact**

The monomer(s) of this resin are listed in Anvisa RDC 56/2012 and RDC No 589.

The additive(s) of this resin are listed in Anvisa RDC 326/2019.

RESOLUTION - RDC NO. 589, DE 20 DECEMBER 2021 Article 2 is applicable to a final article.

### **Swiss Food Contact**

The monomer(s) and the additive(s) of this resin are listed in SR 817.023.21 Regulation on materials and articles intended to come into contact with food Annex 2.

This product was tested for the overall migration compliance and specific migration compliance per Commission Regulation (EU) No 10/2011. The tested sample thickness was 3.175 mm (125 mils). The surface-to-volume ratio was 1 dm<sup>2</sup> sample to 1dl simulant.

For measuring the overall migration levels, this product was tested with 3% acetic acid for 10 days at 40°C, with 50% ethanol for 10 days at 40°C, and with olive oil for 10 days at 40°C. For measuring specific migration levels, this product was tested with 3% acetic acid for 10 days at 60°C, with 50% ethanol for 10 days at 60°C, and with olive oil for 10 days at 60°C. This product complies with the overall migration limit (OML) and specific migration limits (SML).

### **U.S. Pharmacopeia (USP)**

This product meets the standards set by the United States Pharmacopoeia USP 39 <87> Biological Reactivity Tests, in Vitro.

## **Product Regulatory Overview (PRO) Food Contact/ Drug Packaging Marlex® HXM 50100P Polyethylene**

This product meets the standards set by the United States Pharmacopoeia USP 39 <661.1> Plastic Materials of Construction – *Identification, Physicochemical, and Extractable Metals tests*.

### **European Pharmacopoeia (EUP)**

This product meets the requirements of European Pharmacopoeia 3.1.3. the 8<sup>th</sup> edition “Polyolefines” materials used for the manufacture of containers.

This product contains an additive not listed on European Pharmacopoeia 3.1.5.

### **ICHs: Elemental Impurities and Residual Solvents**

Does not intentionally contain, except chromium (trivalent), the metals described in the ICH Harmonized Guideline for Elemental Impurities Q3D dated 26 April 2022 (including Cd, Pb, As, Hg, Co, V, Ni, Ti, Au, Pd, Ir, Os, Rh, Ru, Se, Ag, Pt, Li, Sb, Ba, Mo, Cu, Sn, Cr). These metals, except chromium, to the best of our knowledge are not intentionally added.

ICH/Q3C “Impurities: Guideline for Residual Solvents” is about the requirements for pharmaceuticals and as such is not applicable to polyethylene pellets, but this product, as shipped, does not intentionally contain Class I, Class II or Class III solvents.

### **Animal-Derived Materials (ADM)/ BSE/TSE**

Animal-derived materials are not intentionally used in the manufacture or formulation of this product.

### **USDA**

The USDA recognizes FDA statements provided by material suppliers for food packaging.
