

**Marlex® HXM 50100P Polyethylene**

Version 1.3

Revision Date 2026-09-24

Version	Revision Date:	SDS Number (Internal):	Date of last issue: 2015-05-19	MSDS number:
1.3	2026-09-24	100000102147	Date of first issue: 2014-08-06	

1. PRODUCT AND COMPANY IDENTIFICATION

Product name : Marlex® HXM 50100P Polyethylene

Material : 1115912, 1115891, 1115338, 1115348, 1115335, 1115336, 1115346, 1115349, 1115337, 1115350, 1115347, 1115329, 1115328

Product code : 000000000000000000 000000000000000000

Recommended use of the chemical and restrictions on use

Restrictions on use : This material should not be used for purposes other than the identified uses in section 1 without expert advice.

MEDICAL APPLICATION CAUTION: Do not use this material in medical applications involving permanent implantation in the human body or permanent contact with internal body fluids or tissues fluids or tissues.

Do not use this material in medical applications involving brief or temporary implantation in the human body or contact with internal body fluids or tissues unless the material has been provided directly from Chevron Phillips Chemical Company LP or its legal affiliates under an agreement which expressly acknowledges the contemplated use.

Chevron Phillips Chemical Company LP and its legal affiliates makes no representation, promise, express warranty or implied warranty concerning the suitability of this material for use in implantation in the human body or in contact with internal body fluids or tissues.

2. HAZARDS IDENTIFICATION**GHS Classification**

This material is not classified as hazardous under the Article 104 of the Occupational Safety and Health Act (OSHA). It is not regulated for the MSDS creation and labeling by the provision of Article 110 Paragraph 1 of the OSHA.

GHS label elements

This material is not classified as hazardous under the Article 104 of the Occupational Safety and Health Act (OSHA). It is not regulated for the MSDS creation and labeling by the provision of Article 110 Paragraph 1 of the OSHA.

Other hazards which do not result in classification

No data available

**Marlex® HXM 50100P Polyethylene**

Version 1.3

Revision Date 2026-09-24

Version	Revision Date:	SDS Number (Internal):	Date of last issue: 2015-05-19	MSDS number:
1.3	2026-09-24	100000102147	Date of first issue: 2014-08-06	

3. COMPOSITION/INFORMATION ON INGREDIENTS**Components**

Chemical name	Common Name	CAS-No.	Concentration (% w/w)
Polyethylene Hexene Copolymer	1-Hexene, polymer with ethene	25213-02-9	>= 95 - <= 100

No hazardous ingredients

4. FIRST AID MEASURES

In case of eye contact	:	In the case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
In case of skin contact	:	If the molten material gets on skin, quickly cool in water. Seek immediate medical attention. Do not try to peel the solidified material from the skin or use solvents or thinners to dissolve it.
If inhaled	:	Move to fresh air in case of accidental inhalation of dust or fumes from overheating or combustion. If symptoms persist, call a physician.
If swallowed	:	Do not induce vomiting without medical advice.
Most important symptoms and effects, both acute and delayed	:	None known.
Notes to physician	:	Treat symptomatically.

5. FIRE-FIGHTING MEASURES**Suitable and unsuitable extinguishing media**

Suitable extinguishing media : Water
Water mist
Dry chemical
Carbon dioxide (CO₂)
Foam

If possible, water should be applied as a spray from a fogging nozzle since this is a surface burning material. The application of high velocity water will spread the burning surface layer. Avoid the use of straight streams that may create a dust cloud and the risk of a dust explosion. Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

Specific hazards during fire fighting	:	Risks of ignition followed by flame propagation or secondary explosions can be caused by the accumulation of dust, e.g. on
---------------------------------------	---	--

**Marlex® HXM 50100P Polyethylene**

Version 1.3

Revision Date 2026-09-24

Version	Revision Date:	SDS Number (Internal):	Date of last issue: 2015-05-19	MSDS number:
1.3	2026-09-24	100000102147	Date of first issue: 2014-08-06	

floors and ledges.

Specific extinguishing methods : This material will burn although it is not easily ignited.

Special protective equipment for fire-fighters : Use personal protective equipment.
Wear self-contained breathing apparatus for firefighting if necessary.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures : Sweep up to prevent slipping hazard.
Avoid breathing dust.
Avoid dust formation.
Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration.
Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air).

Environmental precautions : Do not contaminate surface water.
Prevent product from entering drains.

Methods and materials for containment and cleaning up : Clean up promptly by sweeping or vacuum.

7. HANDLING AND STORAGE

Advice on protection against fire and explosion : Treat as a solid that can burn.
Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.

Advice on safe handling : Use good housekeeping for safe handling of the product.
Keep out of water sources and sewers. Spilled pellets may create a slipping hazard.

Electrostatic charge may accumulate and create a hazardous condition when handling this material. To minimize this hazard, bonding and grounding may be necessary, but may not by themselves be sufficient.
At elevated temperatures (>350°F, >177°C), polyethylene can release vapors and gases, which are irritating to the mucous membranes of the eyes, mouth, throat, and lungs. These substances may include acetaldehyde, acetone, acetic acid,

**Marlex® HXM 50100P Polyethylene**

Version 1.3

Revision Date 2026-09-24

Version	Revision Date:	SDS Number (Internal):	MSDS number:
1.3	2026-09-24	100000102147	Date of last issue: 2015-05-19 Date of first issue: 2014-08-06

formic acid, formaldehyde and acrolein. Based on animal data and limited epidemiological evidence, formaldehyde has been listed as a carcinogen. Following all recommendations within this SDS should minimize exposure to thermal processing emissions.

Conditions for safe storage : Keep in a dry place.
Keep in a well-ventilated place.

Materials to avoid : Do not store together with oxidizing and self-igniting products.

Further information on storage stability : No decomposition if stored and applied as directed.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION**Ingredients with workplace control parameters**

Contains no substances with occupational exposure limit values.

Engineering measures : Consider the potential hazards of this material (see Section 2), applicable exposure limits, job activities, and other substances in the work place when designing engineering controls and selecting personal protective equipment. If engineering controls or work practices are not adequate to prevent exposure to harmful levels of this material, the personal protective equipment listed below is recommended. The user should read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances.

Personal protective equipment. Among the following personal protective equipment, the PPEs which require safety certification need to be certified by KOSHA.

Respiratory protection : No respiratory protection is normally required. If heated material generates vapor or fumes that are not adequately controlled by ventilation, wear an appropriate respirator. Use the following elements for air-purifying respirators: Organic Vapor and Formaldehyde.
A positive pressure, air-supplying respirator may be appropriate if there is potential for uncontrolled release, aerosolization, exposure levels are not known, or other circumstances where air-purifying respirators may not provide adequate protection.

Eye protection : Dust safety masks are recommended when the dust concentration is excessive.
Use of safety glasses with side shields for solid handling is good industrial practice. If this material is heated, wear chemical goggles or safety glasses with side shields or a face

Skin and body protection : shield. If there is potential for dust, use chemical goggles. At ambient temperatures use of clean and protective clothing is good industrial practice. If the material is heated or molten, wear thermally insulated, heat-resistant gloves that are able to withstand the temperature of the molten product. If this material is heated, wear insulated clothing to prevent skin contact if engineering controls or work practices are not adequate.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance : Pellets

Color : Opaque

Odor : Mild to no odor

Odor Threshold : No data available

pH : Not applicable

Melting point/ range : 90 - 140 °C

Freezing point : Not applicable

Initial boiling point and boiling range : Not applicable

Flash point : No data available

Evaporation rate : Not applicable

Self-ignition : No data available

Upper explosion limit / Upper flammability limit : Not applicable

Lower explosion limit / Lower flammability limit : Not applicable

Vapor pressure : Not applicable

Solubility(ies)

Water solubility : negligible

Solubility in other solvents : No data available

Relative density	:	Not applicable
Density	:	0.91 - 0.97 g/cm3
Partition coefficient: n-octanol/water	:	No data available
Decomposition temperature	:	Low molecular weight hydrocarbons, alcohols, aldehydes, acids and ketones can be formed during thermal processing.
Viscosity		
Viscosity, dynamic	:	Not applicable
Viscosity, kinematic	:	Not applicable

10. STABILITY AND REACTIVITY

Chemical stability and possibility of hazardous reactions	:	Reactivity: This material is considered non-reactive under normal ambient and anticipated storage and handling conditions of temperature and pressure. Chemical stability: This material is considered stable under normal ambient and anticipated storage and handling conditions of temperature and pressure. Possibility of hazardous reactions: None known.
Conditions to avoid	:	Avoid prolonged storage at elevated temperature.
Incompatible materials	:	Avoid contact with strong oxidizing agents.
Hazardous decomposition products	:	Normal combustion forms carbon dioxide, water vapor and may produce carbon monoxide, other hydrocarbons and hydrocarbon oxidation products (ketones, aldehydes, organic acids) depending on temperature and air availability. Incomplete combustion can also produce formaldehyde.

11. TOXICOLOGICAL INFORMATION

Information on likely routes of exposure	:	No data available

Further information**Product:**

Remarks : This product contains POLYMERIZED OLEFINS. During thermal processing (>350°F, >177°C) polyolefins can release vapors and gases (aldehydes, ketones and organic acids) which are irritating to the mucous membranes of the eyes, mouth, throat, and lungs. Generally these irritant effects are all transitory. However, prolonged exposure to irritating off-gases can lead to pulmonary edema. Formaldehyde (an aldehyde) has been classified as a carcinogen based on animal data and limited epidemiological evidence.

12. ECOLOGICAL INFORMATION**Ecotoxicity****Product:**

Toxicity to fish : Remarks: Not applicable

Toxicity to daphnia and other aquatic invertebrates : Remarks: No data available

Ecotoxicology Assessment

Acute aquatic toxicity : This product has no known ecotoxicological effects.

Chronic aquatic toxicity : This product has no known ecotoxicological effects.

Persistence and degradability**Product:**

Biodegradability : Remarks: This material is not expected to be readily biodegradable.

Bioaccumulative potential**Product:**

Bioaccumulation : Remarks: Does not bioaccumulate.
